**bap'tism**, 1 bap'tizm; 2 bāp'tizm, *n.* 1. The act of baptizing; a sacrament, ordinance, or rite commanded by Christ (*Matt.* xxviii, 19), in which water is made use of, to initiate the recipient into the Christian Church, or to symbolize purification or spiritual burial and resurrection with Christ, or to signify or seal union with Christ as Savior and Lord, or to acknowledge consecration to Christ. Different views are held regarding (1) the proper subjects of baptism — whether believers only, or believers and their children, or others besides these; (2) the ritual act — whether by immersion, affusion (pouring), or sprinkling; (3) its efficacy — whether a mere rite or symbol, an ordinance indicating and sealing spiritual grace and regeneration already possessed, or a sacrament conferring these.

Melanchthon's doctrine is identical with Luther's. He says that God inscribes 'by means of the water his promise' in a certain sense 'upon our bodies.' The Reformers were convinced that children must be baptized in order to be saved; for on account of original sin they also need pardoning and renovating grace. . . . It is evident that Calvin counts baptism only among the normal means which bind the elect to the Church.

*New Schaff-Herzog Encyc.* vol. i, p. 439.  
 The principal effects of baptism are: (1) The remission of all sin, original and actual. . . . (2) But baptism not only washes away sin, it also remits the punishment of sin. . . . (3) Another effect of baptism is the infusion of sanctifying grace. . . . (4) Theologians likewise teach that baptism gives man the right to those special graces for which the sacrament was instituted. . . . (5) Finally, baptism, once validly conferred, can never be repeated. . . . baptism is said to impress an ineffaceable character on the soul. *Catholic Encyc.* vol. ii, p. 268.

2. A religious ablution signifying purification or consecration, as that by which proselytes were Judaized, or the Roman Catholic christening of bells.

The Fathers themselves were the first to recognize that 'the devil too, had his sacraments,' and that the Eucharist, Isaac, Mithraic and other mystic initiations, in distinction from baptism, were initiations into a false religion. *Encyc. Brit.* 11th ed. vol. iii, p. 369.

3. *Chr. Sci.* Immersion in and cleansing by the Divine Spirit. — **bap'tis-tion**.

**baptism for the dead**, in the opinion of good authorities, the baptism after death, or of a living substitute, of some one who died unbaptized. *1 Cor.* xv, 29. — **b. of blood** (*Christian Ch. Hist.*), death as a martyr before baptism: considered as a substitute for and equivalent to the actual rite. — **b. of or by desire**, justification received without baptism by a person who loves God, and desires but can not obtain the rite. — **b. of fire**. 1. *Theol.* (1) The baptism of the Holy Ghost, in distinction from the sacrament of baptism, (*Acts* ii, 3, 4), or (2) the overwhelming with judgment or suffering: variously understood. 2. Martyrdom. 3. The initiatory experience of a soldier in actual battle. 4. Figuratively, any crucial ordeal or heartrending grief. — **clinical** or **clinical b.**, bedside baptism in case of approaching death — conditional or hypothetical b., in the Anglican and Roman Catholic churches, baptism administered with a conditional formula before the sacramental words when it is not known whether the candidate has been baptized, or validly baptized, before.

**bap-tis'mal**, 1 bap-tis'mal; 2 bāp-tis'mal, *a.* Of or pertaining to baptism; as, baptis'mal name, name, vow, etc. — **baptis'mal character**, the seal of baptism, in which spiritual grace is held to be conferred, so that a repetition of the rite would be sacrilege. — **b. name**, the name given at baptism. — **b. regeneration**, regeneration by baptism; the doctrine that baptism is a vehicle of grace pledging the forgiveness of sins and initiating a life of grace. — **bap-tis'mal-ly**, *adv.*

My brother gave that name to me When we were children twain,  
 When names acquired baptismally Were hard to utter.

**Bap'tist**, 1 bap'tist; 2 bāp'tist, *n.* *Ch. Hist.* 1. One of a Christian denomination basing its polity on the New Testament only, and holding that the only valid Christian baptism is the immersion of a convert upon his credible profession of faith in Christ, and also that the visible Church is properly constituted only of those who have been regenerated and baptized.

The Baptists are a distinct denomination date from the time of the Reformation. They were at one time oppressively termed *Anabaptists*. In 1611, owing to persecution, many Baptists fled to America, the first organized Baptist church being founded by Roger Williams at Providence, R. I., in 1639. Meanwhile the English Baptists in 1611, 1644, and 1646 published their *Confessions of Faith*; in 1689 a General Assembly in London issued a Confession in 32 articles together with a Catechism. The English Baptists were divided into two sections, the *General* or *Arminian* (1609) and the *Particular* or *Calvinistic* (1633), but these were finally united in 1801. The first Baptist church in Scotland was established in Calithness in 1750. The Baptists are trinitarians, and their churches are congregational in government. Those who maintain that total immersion is necessary for communion are called *close communionists*, as opposed to the *open communionists*. The total number of Baptists in the United States is estimated at about 6,000,000; and in the United Kingdom 1,500,000, while the total number of English-speaking Baptists is estimated at 9,230,000.

2. The designation of various bodies of Christians, differing in name of their doctrines, but holding the immersion of the believer to be the only Christian baptism. 3. One of any non-Christian denomination employing a mode of baptism, as the Mandaeans. 4. [Archaic.] One who administers baptism; as, John the Baptist (*Matt.* xiv, 2).

— **Baptist Church of Christ**, an organization founded in Tennessee about 1808, holding to general atonement and practising foot-washing as a religious ordinance. — **Calvinistic Baptists**, that part of the Baptist denomination which adheres to the doctrines of Calvin as distinguished from those of Arminius. Compare **REGULAR BAPTISTS**.

— **Free or Free-will B.**, one of a body of Baptists that originated in New Hampshire in 1780, rejecting the Calvinistic doctrine of predestination and practising open communion. — **General Baptists**, a body of Baptists formed from the older English type in Kentucky in 1824 who agree in doctrine more closely with the Regular Baptists than do the Free Baptists. They adopted open communion in 1830. — **German B.**, see **DUNKER**. — **Landmark B.**, one of a body of Baptists found principally in the southwestern United States who deny fellowship with the Pedobaptists and the validity of their baptism. — **Old-Two-Seed-in-the-Spirit Predestinarian B.**, a follower of a strongly Calvinistic sect formed in Tennessee in 1806, whose doctrine maintained a belief in a dualistic origin of good and evil, and opposed "modern institutions" and a paid ministry.

— **Original Free-will B.**, one of a small body of Baptists arising in North Carolina in 1729, who adopted their name to distinguish themselves from the larger body in New Hampshire, from whom they differ in the practise of foot-washing and anointing the sick with oil. — **Primitive or Old School B.**, one of an extremely Calvinistic body, popularly called Anti-Mission and "Bar-shall" Baptists, originating in New York and Pennsylvania about 1835 in opposition to missionary, Bible, tract, and temperance societies, Sunday-schools, theological seminaries and colleges, etc. — **Regular Baptists**, a Calvinistic body of Baptists originating in Rhode Island in 1639 and forming the bulk of this denomination. In 1845 differences arose concerning the slavery question which divided the church into two sections, the North and the South. — **Separate B.**, one of a body of Baptists in Indiana who owe their origin to their dissent from the Whitefield revival, agreeing in doctrine generally with the Free Baptists. — **Seventh-Day B.**, one of a body of Baptists, arising in England in the 16th century and organized in Rhode Island in 1671, who observe the seventh day of the week, or Saturday, as the Sabbath. — **Six-Principle B.**, one of a body of Baptists organized in 1690 on the basis of the six principles—repentance, faith, baptism, laying on of hands, resurrection of the dead, and eternal life. The Six Principles are a survival of the General Baptists who flourished in Rhode Island and Connecticut in 1639, and their churches are gradually becoming extinct. — **United Baptists**, a body of Baptists, of modified Calvinistic doctrine, formed by the union of Regular and Separate Baptists in Kentucky in 1801. They practise close communion and insist upon foot-washing as an essential ordinance.

**base ball**, *n.* A game played with bat and ball, named from the four bases or bounds which mark the course each runner must take; also, the ball used in the game: called the "national game of the United States."

The players are divided into two sides, generally of nine each, one being *out of the bat* and the other *in the field*, alternately. Each player of the former, in his turn, tries to bat the ball (thrown by one of the opposing side, the pitcher) in such a manner that the batsman can reach one of the bases before the ball can be thrown there, or before he can be touched with it. In all cases the circuit must be made in regular order. He then tries in like manner to *beat* to **D**, 60 feet 6 inches; **E**, first baseman; **F**, while succeed **E**, second baseman; **A**, third baseman; **G**, **I**, **N**, **O**, on the shortstop; **M**, **N**, **O**, outfielders; **P**, space side near the bat, to which base-runner must confine himself; reach the next base, **Q**, **Q**, players' benches.

and so to make the circuit. He is out if the ball, when he strikes it, is caught by an opponent before it bounds, or if he misses the ball three times and it is then caught by the player behind him (the catcher), and also in certain other contingencies. When three players on a side are out the sides change places, and when each side has had its turn at the bat an *inning* is concluded. Nine *innings* usually constitute a game. The side that has scored the greater number of runs wins the game.

Some of the terms used in the game are the following. Those not self-explanatory are defined in their appropriate places.

Ba'tha-la', 1 ba'ta-lō'; 2 ba'ta-lō', n. [P. I.] The Supreme Being in ancient Tagalog mythology; among Christianized Filipinos, the infant Jesus. [*Old Tag. bat, man, a ha, Delyo or Power, a la or lat, woman.*]

Bathala, or Bathala Maycayal, in the Tagalog, is the Creator or oldest of all the gods. There seems to be doubt among the natives as to his 'birth', and some declare him to have come from a faraway country and made the lesser deities to serve him, and then man to serve them. The name indicates his functions.—Bat = man, ha = Power or divinity, and la or lat = woman; hence, man and woman, divinely joined. 'Taon', his Visayan name, indicates antiquity, and Moha, the name given him by the Negritos, indicates a slight shade of difference in meaning.

charge or current. (2) A single voltaic cell or couple: a misnomer.

The principal types of electric battery in practical use are (1) the chemical, galvanic, or voltaic, in which the energy of the current is transformed chemical energy; (2) the thermoelectric or pyroelectric, in which heat-energy is converted into that of electricity; and (3) the secondary or storage, serving merely to store energy from an outside source. Each cell of the voltaic battery consists in general of two different metals, immersed in a fluid or fluids that act chemically on one of them, as zinc and copper in solutions of zinc sulfate and copper sulfate respectively in the Daniell type, zinc and platinum in dilute sulfuric and strong nitric acids, respectively, in the Grove, or zinc and carbon in ammonium chloride in the Leclanché. The thermoelectric battery consists in general of strips of two metals, as bismuth and antimony, so arranged that alternate junctions can be heated while the others are kept cool. Storage-batteries consist usually of lead plates immersed in an electrolyte. A current, as from a dynamo, causes the positive and negative plates to be affected differently, and hence, when it ceases and the proper connections are made, they act like different metals, and set up a reverse current, as once on the principle of the ordinary voltaic cell. While the energy "stored" in the battery is thus chemical, it can be obtained at will in the electrical form. Edison's storage battery, a voltaic combination in an alkaline electrolyte. The active materials are oxides of nickel and of iron, the positive plate consisting of a grid of nickel-plated steel, holding 30 tubes filled with an oxide of nickel interspersed with nickel-flake; and the negative plate consisting of a similar grid, containing 24 flat rectangular pockets filled with an oxide of iron mixed with a small proportion of mercury. The plates are placed alternately and when assembled with proper insulating pieces are put into a nickel-plated can or container, whose cover is welded on by an autogenous process. The electrolyte is a solution of caustic potash in water. The battery weighs only about one-half as much as a lead battery for the same output.

Edison Storage Battery.

Many electric batteries derive their names (1) from a substance used in the cells; as, *alum-battery*, *carbon-b.*, *chloride of lime*, *silver*, or *tin b.*, *coke-b.*, *gas-b.*, *nickel-b.*, *perchloride of iron b.*, *peroxide of lead* or *manganese b.*, *selalum-b.*, *water-b.*, etc.; (2) from their inventor; as, *Bunsen b.*, *Byrne b.*, *Callan b.*, *Camacho b.*, *Carré b.*, *Clamond b.*, *Gaiffe b.*, *Latimer-Clark b.*, *Menot b.*, *Muirhead b.*, *Münch b.*, *Nobilis b.*, *Planté b.*, *Ponce b.*, *Pulvermacher b.*, etc.; (3) from the nature of the sources of electricity combined; as, *dynamo b.*, *galvanic b.*, *Leyden-jar b.*, *thermoelectric b.*, etc. Other varieties are: *aerated battery*, a battery in which polarization of the negative element is prevented by agitating the exciting fluid by a current of air (see *POLARIZATION*); *agglomerated b.*, in which the salt for preventing polarization is compressed into a cylinder around the negative element, thus replacing the porous cup; *bank-b.*, one from which separate circuits are supplied with current, also one connected in multiple arc; *cautery-b.*, with high electromotive force and low internal resistance, for heating a cautery-wire; *closed or open circuit b.*, see *CIRCUIT*; *column b.*, a voltaic pile; *double-fluid b.*, having two exciting fluids; *dry b.*, a battery composed of cells whose contents are solid or nearly so; a *dry pile*; *floating b.*, a storage-battery connected between live wires or feeders in such a way that it charges at light load and discharges at heavy load; *gravity b.*, a two-fluid battery in which there is no porous cup and in which the fluids are separated by their different specific gravities; *inconstant b.*, any single-fluid battery; *magnazine b.*, in which the strength of the excitant solution is kept up by a supply of the crystals or other substance immersed therein; *marine b.*, one excited by the water of the ocean; *mechanical b.*, in which polarization is prevented and the action increased by agitation of the plates; *perfluent b.*, in which the flow of the exciting liquid through it keeps it constant; *plunge-b.*, *plunging-b.*, in which one or both elements may be withdrawn from the exciting fluid, to render it inoperative, when desired; *pneumatic b.*, an aerated battery; *split b.*, a voltaic battery connected in series (see *SERIES*), and having one of its middle plates connected with the ground so as to maintain its poles at potentials differing in opposite directions from those of the earth; *standard b.*, a battery having constant electromotive force. 3. *Hat-making*. A large open boiling-vat having a conical plank bottom, and containing diluted sulfuric acid: used in felting. 4. *Lav.* Any unlawful beating or use of force by one person upon another committed wilfully or from want of sufficient care: usually in the phrase *assault and battery*. Compare *ASSAULT*.

The least touching of another's person wilfully, or in anger, is a battery. BLACKSTONE Commentaries bk. iii, ch. 8, p. 120.

5. *Mining*. (1) A structure of timber to keep coal in place. (2) An embankment or platform from which miners work. 6. Any apparatus in which similar parts are assembled to serve a common end; as, a *battery* of evaporating-pans; a *battery* of prisms in a spectroscope; a *battery* of boilers, magnets, or reducing-stamps; a *battery* of hatching-jars in pisciculture; a *battery* of Roman candles. 7. *Baseball*. The pitcher and the catcher together. 8. A number of pieces of metal, or an assemblage of metal articles; especially, metal utensils used in serving meals. 9. A box or boat submerged to the rim, used in shooting wild fowl; a *sink-battery*: prohibited by law in many localities. 10. [Slang. W. U. S.] A revolver.

A man would pull out his battery  
For anything—may be the price of whisky.  
BRYN HARTY Babes in the Wood st. 1.

11. *Courtennis*. That part of the wall of the court which is bounded at the top by the ponthouse roof or the bottom of the galleries. 12. The act of battering; attack with or as with a battering-ram. [*< F. batterie, < battere; see BATTER, v. >*] *battery* *amalgamation* (*Metall.*), amalgamation by means of mercury placed in the mortar. *b. d'enfilade*, a battery enfilading a fortification or body of troops. *b. en échappe* (*Fr.*), an oblique-firing battery. *fixed b.* 1. A battery of guns or mortars fixed in place in a permanent fortification. 2. A heavy siege-gun battery more or less fixed in position. 3. A field-fortification more or less permanent for field- or siege-guns. *In b.*, in position for firing, as a gun in a battery: opposed to *out of or from battery* (withdrawn for loading). *Intermediate b.* (*Navy*), a battery, as on certain war-ships, consisting of

guns having a caliber of from 4 to 7 inches: not included on modern battle-ships.—The *Battery*, a public park at the southern point of Manhattan island, New York city; the site of fortifications once erected by the Dutch and containing the Barge Office and Castle Garden, now the New York Aquarium.

*bat'teuse*, 1 *bat'tuz*; 2 *bat'tus*, *n.* [*F.*] In silk-manufacture, the person who brushes and cleans cocoons in readiness for throwing.

*Batth-yān'yī*, 1 *bat-yān'yī*; 2 *bat-yān'yī*, *Count*, Louis (4/1809-10/1849). A Hungarian patriot; prime minister, 1848; count-martialed and shot.

*Bat'ti-ca-lo'a*, 1 *bat'ti-ka-lō'a*; 2 *bat'ti-ka-lō'a*, *n.* A city on the E. coast of Ceylon.

*bat'tick*, 1 *bat'tik*; 2 *bat'tik*, *n.* A small tick-like nycteribid dipterous insect parasitic on bats.

*bat'ting*, 1 *bat'ting*; 2 *bat'ting*, *n.* 1. Cotton or wool prepared in sheets for use in making quilts or the like. 2. The act of treating raw cotton in a batting-machine. 3. The act or manner of using a bat. *bats*; *bat'ti*; *bat'ting-block*, *n.* *Ceram.* A plaster slab on which plastic clay is beaten before going to the whirling-table. *b. board*, *n.* *Wear.* A device in a Jacquard loom to thrust forward the needles.—*b. hammer*, *n.* A deeply grooved wooden mallet, with a long curved handle, for beating flax, cotton, or *b. machine*, *n.* A machine for scutching, blowing, and lapping partially loosened and cleaned cotton, and delivering it in a bat.—*b. staff*, *n.* A beater used by laundresses in washing linen.

*bat'fish*, 1 *bat'ish*; 2 *bat'ish*, *a.* Of, pertaining to, or like a bat.

*Bat-tis'ta*, 1 *bat-tis'ta*; 2 *bat-tis'ta*, *n.* [*It.*] Baptist.

*bat'tle*, 1 *bat'tle*; 2 *bat'tle*, *v.* [*BAT'TLED, BAT'TLED*; *BAT'TLE*, *BAT'TLING*.] *I.* To contend in battle or as in battle; fight; struggle; strive.

Webster uses *battle* by *battling* against difficulties. E. P. WARRICK *Essays and Reviews* vol. i, p. 178, in. M. & Co. 1882.]

*II. t.* 1. [*Rare*.] To assail with arms; fight; as, to *battle* one another. 2. To put in battle array. 3. To fight for. [*< OF. batailler, < bataille; see BATTLE, n.*]

*bat'tle*, *vt.* [*BAT'TLED; BAT'TLING*.] [*Archaic*.] To beat (a fabric) with a beetle during washing or while drying.

*bat'tling-stick*, *n.* A *battling-staff*.

*bat'tle*, *vt.* To fortify with battlements.

*bat'tle*, *n.* [*North. Eng. & Scot.*] 1. Nourishing or fattening for cattle or sheep: said of pasturage. 2. Fertile; productive: said of land. *bat'tle*; *bat'tel*.

*bat'tle*, *n.* 1. The act of fighting; an engagement, combat, or conflict between hostile forces on sea or land; warfare; hence, any struggle or contest; as, the *battle* of life. *Battle* is now more properly used of a contest between large numbers with fierce and prolonged fighting. It is an element of some self-explaining names of things used in, during, or for battle; as, *bat'tle-axe*, *b.-brand* (a sword), *b.-club*, *b.-ery*, *b.-field*, *b.-flag*, *b.-ground*, *b.-mace*. Great battles are really won before they are fought. J. LUSBOCK *Pleasures of Life* p. 26. [*n. a.* 1887.]

2. A fight between two persons, especially a trial by combat. 3. [*Archaic*.] Instruments of war; arms: used collectively. Ps. lxxvi, 4; Hos. ii, 20. 4. *Bowling*. A game resembling tennis, but differing from it in that no more than six innings are played except in case of a tie, in that knocking down all pins but the king-pin counts twelve, and in several other details. 5. A division of an army, or its main body. 6. A war. [*< OF. bataille, < LL. battalia, < batto; see BATTER, v.*] *bat'tle*; *bat'taler*; *bat'tel*.

*Syn.* action, affair, bout, combat, conflict, contest, encounter, engagement, fight, skirmish. *Conflict* is a general word which describes opponents, whether individuals or hosts, as dashed together. One continuous conflict between entire armies is a *battle*. Another *battle* may be fought upon the same field after a considerable interval; or a new battle may follow immediately, the armies meeting upon a new field. An action is brief and partial; a battle may last for days. *Engagement* is a somewhat formal expression for battle; as, it was the commander's purpose to avoid a general engagement. A protracted war, including many battles, may be a stubborn contest. *Combat*, originally a hostile encounter between individuals, is now used also for extensive engagements. A *skirmish* is between small detachments or scattered troops. An *encounter* may be either purposed or accidental, between individuals or armed forces. *Fight* is a word of less dignity than *battle*; we should not ordinarily speak of Waterloo as a *fight*, unless where the word is used in the sense of fighting; as, I was in the thick of the *fight*.—*Ant.* armistice, concord, peace, suspension of hostilities, truce.—*Prep.* a battle of giants; *between* and *between* armies; a battle for life, against invaders; a battle to the death; the battle of (more rarely) at Marathon.

*Battle Above the Clouds*, the contest above the clouds forming part of the battle of Chattanooga, Nov. 24, 1863, and resulting in the capture of Lookout Mountain by the Federal troops under General Hooker.—*bat'tle-lan-tern*, *n.* *Nat.* A lantern or movable electric light, hung between decks and near the guns during a night engagement.—*B. of the Books*, a satire by Dean Swift relating to a current discussion as to merits of ancient and of modern works.—*B. of the Brothers*, the battle of Fontenoy. See *list*.—*B. of the Frogs* and *Mice*, same as *BAT-RACHOMYOMACHY*.—*B. of the Kegs*, a satirical song by Francis Hopkinson ridiculing the British troops for misadventure in the Delaware river for torpedoes and firing on them.—*B. of the Kings*, the battle of four kings against five described in Gen. xiv.—*B. of the Nations*, the battle of Lepzig. See *list*.—*B. of the Spurs*. 1. Defeat of French nobles by burghers at Courtrai, France, July 11, 1302; 4,000 gold spurs captured. 2. Defeat of French by English at Gulginate, near Calais, France, Aug. 16, 1513: so called from the impetuous flight of the French troops.—*B. of the Standard*, English victory over the Scots at Northallerton, Yorkshire, England, Aug. 22, 1138, when the banners of St. Peter of York, St. John of Beverly, St. Willfrid of Ripon, and St. Cuthbert of Durham were flown.—*B. of the Thirty*, a combat between thirty English and thirty French knights which took place in 1351 between the castles of Ploermel and Josselin in France and resulted in the defeat of the English.—*B. of the Three Emperors*, the battle of Austerlitz. See *list*.—*b. piece*, *n.* A painting or piece of music representing a battle.—*b. plane*, *n.* An aeroplane built to carry rapid-fire guns and three-inch cannon; used in aerial warfare.—*quoit*, *n.* Same as *CRICKET*.—*b. range*, *n.* *Mil.* The distance which gives the greatest danger zone for the trajectory of any firearm.—*b. royal*, a general fight; a fight of several game-cocks until one falls.—*b. scarred*, *a.* Having scars of wounds received in battle.—*b. ship*, *n.* A ship designed to fight in line of battle: heavily armored and carrying usually a main battery of from four to ten 12- to 13.5-inch guns or guns of heavier caliber and a proportionate number of

rapid-firing guns of from 5-inch to 8-inch caliber. *Line-of-battleship*. In modern usage distinguished from a *cruiser* by its heavy armor-plating and slower speed, and from a *gunboat* by its greater size and heavier armament.—*bat'tle-stand*, *n.* [*Archaic*.] A battle-field.—*b. written*, *a.* Distorted, twisted, or torn in or as in a fight; as, *bat'tle-written* trees.—*drawn b.*, a battle in which neither party wins a victory.—*pitched b.*, a regularly planned and deliberately executed battle.—*to give b.*, to open or provoke battle; attack.—*to join b.*, to meet or engage in battle.

**bauk**, r. & n. Same as BALK.

**bau'ler-crab**, 1 bau'ler-crab; 2 bät'ler-crab, n. [Scot.] The female of the common crab.

**Baumé**, 1 bäm; 2 bät, n. Antoine (c. 1728-1809), a French chemist and inventor of the *Baumé* aerometer and hydrometers. — **Baumé hydrometer**, either of the two hydrometers using Baumé's scale.

The *Baumé hydrometer* . . . consists of a common hydrometer graduated in the following manner. Certain fixed points were first determined upon the stem of the instrument. The first of these was found by immersing the hydrometer in pure water, and marking the stem at the level of the surface. This formed the zero of the scale. Fifteen standard solutions of pure common salt in water were then prepared, containing respectively 1, 2, 3, . . . 15% (by weight) of dry salt. The hydrometer was placed in each of these solutions in turn, and the scale having been marked at the several surfaces, the degrees so obtained were numbered 1, 2, 3, . . . 15. . . . The instrument thus adapted to the determination of densities exceeding that of water was called the *hydrometer for salts*.

The hydrometer intended for densities less than that of water, or the hydrometer for spirits, is constructed on a similar principle. . . . A solution containing 10% of pure salt is used to indicate the zero of the scale, and the point at which the instrument floats when immersed in distilled water at 10° R. (64° F.) is numbered 0. Equal divisions are then marked off upward along the stem as far as the 50th degree.

— **Baumé's scale** (*Physics*), either of the hydrometric scales designed by Antoine Baumé for determining the specific gravity of (1) acids; (2) liquids lighter than water. See BAUMÉ, v. — **Baumé hydrometer**. Readings on Baumé's scale can be approximately converted into specific gravities by the following formulae: (1) for liquids of greater specific gravity than water, sp. gr. = 144 + (144 - Baumé reading); (2) for liquids of less specific gravity than water, sp. gr. = 144 + (144 - Baumé reading).

**Baumé's**, 1 bäm; 2 bät, n. 1. bäm'-ic-düm, n. A town in the Doubs department, France.

**Baum'gar-ten**, 1 bäm'gar-ten; 2 boum'gar-ten, Alexander Gottlieb (c. 1714-1747). A German philosopher; founded aesthetics as science.

**bau'mler**, 1 bau'mler; 2 bät'myer, n. [Quebec, Canada.] The balsam-poplar (*Populus balsamifera*). [*cf*.]

**bau'n'schedl**-ism, 1 bau'n'schedl; 2 bät'n'schedl, n. *Med.* A cure by means of a sort of needles, followed by rubbing in an irritant oil. [*cf*. Karl *Baunschedl*.]

2. Finely illustrating a type or principle; complete and harmonious in form or development; as, a *beautiful* specimen in botany, or case in surgery.

**Syn.** — attractive, beautiful, bewitching, charming, comely, delightful, elegant, exquisite, fair, fine, good-looking, graceful, handsome, lovely, picturesque, pretty. The definition of beauty, "perfection of form," is a good key to the meaning of *beautiful*, if we understand "form" in its widest sense. There must also be harmony and unity, and in human beings spiritual loveliness, to constitute an object or a person really *beautiful*. Thus, we speak of a *beautiful* landscape, a *beautiful* poem. But *beautiful* implies also, in concrete objects, softness of outline and delicacy of mold; it is opposed to all that is hard and rugged; hence we say a *beautiful* woman, but not a *beautiful* man. *Beautiful* has the further limit of not transcending our powers of appreciation. Pretty expresses a far less degree of that which is pleasing to a refined taste in objects comparatively small, slight, and dainty; as, a *pretty* bonnet; a *pretty* girl. That is *handsome* which is not only superficially pleasing, but well and harmoniously proportioned, with usually the added idea that it is made so by art, breeding, or training; as, a *handsome* horse; a *handsome* house. *Handsome* is a term far inferior to *beautiful*; we may even say a *handsome* villain. *Fair* denotes what is bright, smooth, clear, and without blemish; as, a *fair* face. The word applies wholly to what is superficial; we can say "fair, yet false." In a specific sense, *fair* has the sense of blond, as opposed to dark or brunette. One who possesses vivacity, wit, good nature, or other pleasing qualities may be *attractive* without beauty. *Comely* denotes an aspect that is smooth, genial, and wholesome, with a certain fullness of contour and pleasing symmetry, while falling short of the *beautiful*. As a comely matron. That is *picturesque* which would make a striking picture. See also AGREEABLE; CHARMING; ELEGANT; FINE; LOVELY. Ant.: awkward, clumsy, deformed, disgusting, frightful, ghastly, grim, grisly, grotesque, hideous, horrid, odious, repulsive, shocking, ugly, uncouth, ungraciously. Prep.: beautiful to the eye; beautiful in appearance, in spirit; "beautiful for situation." Ps. xlviii. 2; beautiful of aspect, of his kind.

— the *beautiful*, beauty in the abstract; the domain of beauty; also, that which is beautiful: distinguished from the true and the good; as, the *beautiful* in nature or art. In the threefold division of Ideals as made by some writers, the *beautiful* is apprehended by the taste or esthetic powers, the true by the logical or rational, the good by the moral or practical powers. Anything may thus be at the same time true, beautiful, and good, but from different points of view and for different reasons. This conduces us to the essential foundation of the distinction between the idea of the *beautiful* and the sensation of the agreeable, to wit, the difference already explained between *sensibility* and *reason*. COVINS True, *Beautiful*, etc. tr. by Wight, p. 127. [A. 1855.]

The *beautiful* can never die. If the gods have deserted their oracles, they have not deserted the gods who aspire to them. KINGSLEY *Hyperion* ch. 2, p. 6. [MACC. 1880.]

**beau'ti-ful-ly**, *adv.* — **beau'ti-ful-ness**, *n.*

**beau'ti-ty**, 1 bō'ti-ti; 2 bō'ti-ti, *n.* [*-TIED*; — *FT* 'ING.] **beau'ti-ty**, 1 bō'ti-ti; 2 bō'ti-ti, *n.* To make beautiful; improve in form or effect; embellish; adorn.

**II.** To grow beautiful or more beautiful. [*< BEAUTY* + *-TY*.] **Syn.** — *ADORN*; GARNISH. Compare *BEAUTIFY* for *BEAUTIFY* — **beau'ti-ty**, *n.*

**beau'ty**, 1 bō'ti-ti; 2 bō'ti-ti, *n.* [*-TIES*, 1 -tiz; 2 -tis, pl.] **beau'ty**, 1 bō'ti-ti; 2 bō'ti-ti, *n.* That quality of objects, whether in nature, art, or man, that appeals to and gratifies the esthetic feelings and forms the basis of esthetic judgments, — sometimes called "judgments of taste." The most essential characteristic of this quality seems to be a certain perfection of form (in the broader significance of the latter word) physical or spiritual, resulting from the harmonious combination of diverse elements in unity; the *beautiful*.

The conditions or elements of beauty may be considered as embracing (1) the imaginative or sensuous expression of unity in variety (the principle recognized by the ancient Greeks), (2) the presence and activity of rational or spiritual personality (the principle of the moderns), and (3) perfection of (esthetic or artistic) form. The theories of the ancient Greeks regarding beauty are allied to metaphysics: (a) The Platonic-Aristotelian theory holds that *beauty resides in order*, and in the elements of order — unity and multiplicity (harmony, measure, proportion), and secondly, that *beauty is identical with the good*. (b) The Platonic or Neo-Platonic theory holds that "everything is the whole and not the part is beautiful, that 'everything' contains the essence of essential being," and that true art contains the essence of *beauty*. The Church Fathers adopt and emphasize the esthetic optimism of the Greeks. The Scholastics develop the Platonic-Aristotelian ideas and include contemplation as an essential of beauty. In modern philosophy the Empiricists (beginning with Francis Bacon) regard *beauty* as a sensualistic conception, while the Rationalists (Descartes, Leibnitz, Boileau) differentiate between the sensation and the idea. Kant regards the subjectivity of the beautiful as a law and not merely as a fact. The "ego absolute" in thought, *beauty* is a creation of the "mind" (Hegel), the "will" (Schopenhauer). The Herbartians limit *beauty* to a perception of form and relation, as opposed to the Hegelians, and place it in the realm of psychology instead of metaphysics. The modern tendency is to combine the Greek theories with the modern, and to regard *beauty* not as an absolute but as a relative conception and existing in expressed order. The act of apprehending and appreciating beauty awakens the emotion of the *beautiful*, which is accompanied by a pleasurable feeling often mistaken for that.

Five principal kinds of beauty may be distinguished: that of the sublime, of the proportionate, of the graceful, of the wild or luxurious, and of the pretty or handsome. These are distinguished by the physiological and psychological elements and accompaniments which compose the complex states of consciousness with which different kinds of objects are appreciated as beautiful.

But if beauty consists . . . in form as a revelation of some mode or act of mind through some medium, then it must be alike for every mind that can receive such revelation through such medium. The Church Fathers adopt and emphasize the esthetic optimism of the Greeks. The Scholastics develop the Platonic-Aristotelian ideas and include contemplation as an essential of beauty. Kant regards the subjectivity of the beautiful as a law and not merely as a fact. The "ego absolute" in thought, *beauty* is a creation of the "mind" (Hegel), the "will" (Schopenhauer). The Herbartians limit *beauty* to a perception of form and relation, as opposed to the Hegelians, and place it in the realm of psychology instead of metaphysics. The modern tendency is to combine the Greek theories with the modern, and to regard *beauty* not as an absolute but as a relative conception and existing in expressed order. The act of apprehending and appreciating beauty awakens the emotion of the *beautiful*, which is accompanied by a pleasurable feeling often mistaken for that.

Five principal kinds of beauty may be distinguished: that of the sublime, of the proportionate, of the graceful, of the wild or luxurious, and of the pretty or handsome. These are distinguished by the physiological and psychological elements and accompaniments which compose the complex states of consciousness with which different kinds of objects are appreciated as beautiful.

But if beauty consists . . . in form as a revelation of some mode or act of mind through some medium, then it must be alike for every mind that can receive such revelation through such medium. The Church Fathers adopt and emphasize the esthetic optimism of the Greeks. The Scholastics develop the Platonic-Aristotelian ideas and include contemplation as an essential of beauty. In modern philosophy the Empiricists (beginning with Francis Bacon) regard *beauty* as a sensualistic conception, while the Rationalists (Descartes, Leibnitz, Boileau) differentiate between the sensation and the idea. Kant regards the subjectivity of the beautiful as a law and not merely as a fact. The "ego absolute" in thought, *beauty* is a creation of the "mind" (Hegel), the "will" (Schopenhauer). [< BE- + CAUSE, n.]

**Syn:** as, for, inasmuch as, since. *Because*, literally *by-cause*, is the most direct and complete word for giving the reason of a thing. *Since*, originally denoting succession in time, signifies a succession in a chain of reasoning, a natural inference or result. As it indicates something like coordinate, parallel. *Since* is weaker than *because*; as is weaker than *since*; either may introduce the reason before the main statement; thus, *since* or *as* you are going, I will accompany you. Often the weaker word is the more courteous, implying less constraint; for example, as you request it, I will come, rather than I will come *because* you request it. *Inasmuch* as is a formal and qualified expression, implying by just so much, and no more; thus, *inasmuch* as the debtor has no property, I abandon the claim. *For* is a loose connective, giving often mere suggestion or indication rather than reason or cause; as, it is morning, *for* (not *because*) the birds are singing.—**Ant:** altho, however, nevertheless, notwithstanding.

2. Enhancing beauty; esthetically appropriate; pleasing; adorning; as, a *becoming* cloak: formerly sometimes with *of</*

static or water bed, straw bed; (2) from their construction; as, brass bed, folding bed, iron bed, woven-wire bed; (3) from their use; as, field-bed (army), hospital-bed, etc.

Bed is the first element in many compounds, mostly self-explaining, naming things used for, in, or about a bed; as, bed-chair (combined chair and bed), bedclothes (coverings for a bed), bedcover (coverlet), bed-frame, bed-lounge (combined lounge and bed), bedpost (corner post of a bed), bedquilt, bed-sacking, bed-spring, bed-steps (for a high bed), bedtick (see tick), bedtickling.

2. Hence, any place or thing used for a couch or for sleeping in or on; as, a bed of hay, straw, or hemlock boughs; a rocky bed. 3. A heavy horizontal mass of matter, or a collection of closely massed objects, especially used or considered as a foundation or support. 4. The ground at the bottom of a body of water; as, a river-bed; the bed of the ocean. 5. In technical use, one of a large number of things resembling, likened to, or used for a bed. Some of them are: (1) *Mech.* Some part or surface which serves as a foundation, as the part of a printing-press which supports the form, or a part from which work is fed to a machine. (2) *Masonry.* (a) A layer of mortar in which stones or bricks are to be laid. (b) A horizontal course of a stone wall. (c) The lower side of a slate, tile, or brick. (3) *Naut.* The cradle of a vessel on the stocks. (4) *Hort.* A plot of ground prepared for planting some particular thing, or the plants, etc., growing in such a plot; as, a radish-bed. (5) *Bookbinding.* Dissolved gum tragacanth prepared for marking book-edges. (6) *Billiards & Pool.* That part of the table bounded by the cushions. (7) *Railroad.* A road-bed. (8) *Ordnance.* The support of the old-fashioned smoothbore mortar.

6. One of the divisions marked out in the game of hopscotch. 7. *Geol.* (1) Any layer in a mass of stratified rock, often distinguished by some special characters from contiguous layers.

There is a tendency to use the term *bed* or *beds* more particularly in connection with the softer and less consolidated rocks of the Cretaceous, Tertiary, and Quaternary systems. Beds are named from the place of their occurrence, from the time of their formation, from their manner of deposition, from their lithologic character, or from their characteristic fossil or mineral contents; as, the *Aftonian beds* (Pleistocene of Illinois); *Ceratops b.* (Cretaceous of Wyoming); *Como b.* (Cretaceous of Wyoming); *Glauconitic b.* (Cretaceous of Texas); *Grand Gulf b.* (Tertiary of Louisiana). See *GEOLOGY*.

(2) A deposit, as of ore, parallel to the stratification, later in origin than the rock below, and older than the rock above, thus constituting a regular member of the series of formations, and not an intrusion. 8. A collection of wild fowl massed together, as ducks. 9. The marriage-bed; hence conjugal cohabitation, or the right to it. [AS.]

Syn.: ask, beseech, crave, entreat, implore, petition, pray, request, solicit, supplicate. One asks what he feels that he may fairly claim and reasonably expect; "If a son shall ask bread of any of you that is a father," *Luke* xi, 11; he begs for that to which he advances no claim but pity. Entreat implies a special earnestness of asking, and beseech, a still added and more humble intensity. To implore is to ask with weeping and lamentation; to supplicate is to ask, as it were, on knees. Crave and request are somewhat formal terms; *crave* has almost disappeared from conversation; *request* would seem distant between parent and child. Pray is now used chiefly of address to the Supreme Being; *petition* is used of written request to persons in authority; as, to petition the legislature to pass an act, or the governor to pardon an offender. — Ant.: claim, command, demand, enforce, exact, insist, require. — Prep.: to beg for bread; to beg of a person.

— to beg the question, to take for granted the matter in dispute; assume without warrant something that involves the point under discussion. — to go a-begging, to be without market value; seek in vain for a purchaser or receiver. — beg-ga-ble', a. That may be begged.

2. The first stage of an action or epoch; the first part; as, he made a good beginning. 3. The source, origin, or first cause of anything; as, "I am . . . the beginning," *Rev.* i, 8. 4. [B.] In mystical philosophy, the first person in the Trinity; so used by Dionysius. JOHN COTER *Hierarchies of Dionysius* p. 39. [1869.] — be-gin'-ing, n.

Syn.: commencement, foundation, inauguration, inception, initiation, opening, origin, outset, preface, prelude, rise, source, start, threshold. — The Latin commencement is more formal than the Saxon beginning, as the verb commence is more formal than begin. Commencement is for the most part restricted to some form of action, while beginning has no restriction, but may be applied to action, state, material, extent, enumeration, or to whatever else may be conceived of as having a first part, point, degree, etc. The letter A is at the beginning (not the commencement) of the alphabet. If we were to speak of the commencement of the Pacific Railroad, we should be understood to refer to the enterprise and its initiatory act; if we were to refer to the roadway we should say "Here is the beginning of the Pacific Railroad." In the great majority of cases begin and beginning are preferable to commence and commencement.

An origin is the point from which something starts or sets out, often involving, and always suggesting causal connection; as, the origin of evil; the origin of a nation, government, or family. A source is that which furnishes a first and continuous supply; as, the source of a river; a source of knowledge; a source of inspiration; fertile land is a source (not an origin) of wealth. A rise is thought of as in an action; we say that a lake is the source of a certain river. Motley wrote of "The Rise of the Dutch Republic." Compare CAUSE. — Ant.: close, completion, conclusion, consummation, end, termination.

be-gin'-ler, 1 beg'är-beg; 2 bēg'är-beg, n. [Turk.] The governor-general of a Turkish province, having under him the beys of several sanjaks. — beg'ler-bey', n. [France.]

HECTOR MACNEIL *Come Under my Plaidie* et. 3.  
be-ling, 1 bi'ling; 2 be'ling, *pp.* of BE, *v.* Existing; continuing to be.  
This participle has a special modern use with passive forms of verbs to express progressive action; as, *is*, *are*, or *was* being built, expresses what is expressed also by *is*, *are*, or *was* building, *a*-building, or *in* building.  
Richard Whately, George P. Marsh, Richard Grant White, and other critics have objected strenuously to the use of "is being built," "was being built," and kindred forms of English imperfectly passive, as recent and unwarranted innovations; but Fitzedward Hall has shown conclusively that they are neither recent nor unwarranted, but have been used by the best writers for a century, and now have well-nigh universal literary sanction. He says:  
Prior to the evolution of *is* being built and *was* being built, we possessed no discriminate equivalents of *edificator* and *edificabatur*; *is* built and *was* built, by which they were rendered, corresponding exactly to *edificatus est* and *edificatus erat*.  
Modern English, p. 350, app. (s. 1873.)  
*Is* growing, *was* growing, indicate an activity from within; as, the tree *is* growing from its own internal forces; *is* being grown, *was* being grown, the activity of some agent from without; as, the plant *is* being grown (by the gardener). So also, and strikingly, *is* bleeding (as from a wound), and *is* being bled (as by a surgeon).  
be'ing, *n.* 1. Anything that exists or is conceived as having existence; the widest of all categories, embracing nature and the supernatural, which see.  
"This [being] applies to everything which exists in any way whether as substance or accident, whether actually or potentially, whether in the nature of things, or only in our notions; for even what we call *entia rationis*, or fictions of our minds, such as *hippo-centaur*, or *mountain of gold*, have a being; even *negation* or *privation* has an existence; nay, according to Aristotle, we can say that *nothing* has a being. In short, whenever we can use the substantive verb *is*, there must be some kind of being." K.-F. *Vocab. Philos.* p. 64. [s. et. co. 1873.]  
Thing, individual, person—ens, suppositum, hypostasis, as the scholastics have it—these are the three degrees in the dynamic evolution of being. W. S. LILLY *Right and Wrong* p. 103. bell'et. [< AS. *bellan*; see BELLOW.] *bell'et*, n. To swell up like a bell or boll. [C.]

*bell'*, n. 1. A hollow metallic instrument for giving forth a sound when struck by a clapper within, or by a separate hammer; used generally to give signals, but sometimes, in combination with others, to produce music.

Bells are (1) cup-shaped with flaring edges, as the church-bell, (2) saucer-shaped, as the gong-bell, or (3) spherical with a loose ball within, as the sleight-bell. Many bells are named (1) from their use; as, call-bell, fire-bell, fog-bell, night-bell; or (2) from the object with which they are connected; as, church-bell, cow-bell, door-bell, harness-bell, sheep-bell, shop-bell. "Czar Kolokol," the Great Bell of Moscow.

Bell is the first element in many compounds that are practically self-explaining; as, bell-buoy, bell-call, bell-chuck, bell-cord, bell-faced, bell-founder, bell-foundry, bell-horse, bell-mare, bell-metronome, bell-mouthed, bell-nosed, bell-pull, bell-ringer, bell-rope, bell-shaped, bell-tongued, bell-tower.

2. Anything in the shape of or suggesting a bell. (1) A bell-shaped flower or corolla. (2) The cushions or cushions of Corinthian and similar capitals. (6) *Arch.* (a) The socket or enlarged end of a water-pipe, which receives the small end of the next pipe in line. (b) The vibrating or sounding cylinder of a steam-whistle. (c) The movable cap at the top of a modern blast-furnace, which is lifted to put in the charge of ore, etc. (7) *Geol.* A mass of rock shaped like an inverted bell, embedded in certain strata; apparently a solid filling of a pot-hole, but perhaps due to other causes. In coal-measures, bells occur in the overlying shale, and may extend down into or through a coal-bed. (8) The body of a helmet. (9) In British India, a place, formerly a bell-shaped structure, in which the guns and equipment of a native regiment are kept.

3. The ringing of a bell as a signal or summons to work, meals, etc., as in schools, hotels, and elsewhere.

4. On shipboard, a stroke on a bell to mark the time; with a numeral prefixed, the time thus marked.

The twelve hours of the day are divided into three watches, each of which the half-hours are marked by stroke on a bell. Thus, beginning at midnight, one bell is half past twelve, and eight bells four o'clock; then, one bell is half past four, and eight bells eight o'clock. [< AS. *belle*, < *bellan*; see BELLOW.] — bell-and-shop'per, n. An apparatus for charging a blast-furnace. pl. Bot. A family of fossil plants coordinate with the cycad family of gymnospermous living plants, but char-

series of hydroxylated aromatic carbinols formed from phenols by heating with benzotrichloride. [**< BENZOZIN-.**  
**ben'ze-ne**, 1 ben'zin; 2 bën'zên, n. 1. A colorless, volatile, inflammable liquid compound ( $C_6H_6$ ) obtained chiefly from coal-tar by fractional distillation: preferred word for **benzol**. It is produced synthetically when acetylene is heated to a high temperature; and is also formed when benzoic acid is heated with lime. It burns with a luminous flame, has an ethereal odor, and is useful as a solvent, dissolving fats, resins, iodine, phosphorus, etc. It is employed as an illuminant in gas-manufacture, and is transformed at its boiling point in the formation of the compounds of the benzene series. 2. Benzoic acid. [**< BENZOZIN-**—benzene ring or nucleus, the graphic formula of benzene. The hexagon formula (see diagram) shows that the six hydrogen atoms have equal value. Hence there can be but one mono-substitution product for a single element or radical. A disubstitution product may have three modifications according to the relative position of the substituting atoms or radicals, such positions being indicated by the prefixes *ortho*-, *meta*-, and *para*-, which correspond to the positions (1, 2), (1, 3) and (1, 4) when the number notation (see diagram) is used. Thus *meta*- or 3-dioxybenzene would be written [1, 3]-dioxybenzene.  
When the substituted atoms or radicals are similar, the tri-substitution products are called: (1) *adjacent*, *cisinal* (r) or, *consecutive* when the atoms or radicals are different, occupying the positions 1, 2, 3; (2) *unimolecular asymmetrical* (a or as), or *irregular* when two atoms or radicals are adjacent (occupying the positions 1, 2, 4); (3) *symmetrical* (s) when all the atoms or radicals are separated (occupying the positions 1, 3, 5).—**Benzene Ring.** A compound ( $C_6H_5SO_3OH$ ) obtained by boiling benzene with sulfuric acid.—**ben'ze-nold**, a. Resembling benzene; belonging to the benzene series.  
**ben'zi-dam**, 1 ben'zi-dâm; 2 bën'zî-dâm, n. Same as **ANILIN**.  
**ben'zi-din**, 1 ben'zi-dîn, -dîn or -din; 2 bën'zî-dîn, -dîn  
**ben'zi-dine**, -or -din, n. *Chem.* A crystalline compound ( $C_{10}H_7N$ ) derived from azobenzene by reduction: used in the preparation of dyes. [**< BENZOZIN-**] **Ben'zie**, 1 ben'zi; 2 bën'zî, n. A county in Michigan; 304 sq. m.; county-seat, Frankfort.  
**ben'zil**, 1 ben'zil; 2 bën'zî, n. *Chem.* A yellowish compound ( $C_{14}H_{10}O_2$ ) formed variously, as by oxidizing benzoil with nitric acid. [**< BENZOZIN-**] **ben'zile+**, —**ben'zile-atte**, n. *Chem.* A salt of benzoic acid.—**ben'zile**, a. *Chem.* Of pertaining to, or derived from benzil.—**benzillic acid**, a white compound ( $C_{14}H_{10}O_4$ ) formed variously, as by warming benzil with alcoholic potash.  
**ben'zi-mid**, 1 ben'zi-mîd, -mid or -maid; 2 bën'zî-mîd, -mîd or -mid, n. *Chem.* A white compound ( $C_{12}H_8N_2O_2$ ) contained in oil of bitter almonds, and formed synthetically by treating benzoic aldehyde with hydrocyanic acid. [**< BENZOZIN + AMID-**] **ben'zin**, 1 ben'zin, -zun or -zûn; 2 bën'zîn, -zîn or -zîn, n.  
**ben'zine**, } 1. A colorless inflammable and volatile liquid obtained from petroleum by fractional distillation and consisting of various hydrocarbons. It is used as a solvent for fats, etc., to cleanse clothing, etc. **petro-leum-spir'it**. 2. Benzene: an improper form. [**< BENZOZIN-**] —**ben'zin-pa'per**, n. Paper the surface of which has been subjected to the action of benzil.  
**ben'zo-ate**, 1 ben'zo-ët; 2 bën'zo-ät, n. *Chem.* A salt of benzoic acid.—**benzoate** of soda, sodium benzoate.  
**ben'zo-at'ed**, 1 ben'zo-ët'ed; 2 bën'zo-ät'ed, pa. Impregnated with benzoil or a benzoate; benzoinated.  
**ben'zo-gly-ox-a-lin**, } 1 ben'zo-glai-oks-a-lîn, -lîn or  
**ben'zo-gly-ox-a-line**, } -lîn; 2 bën'zo-gly-ôks-a-lîn, -lîn or  
-lîn, n. *Chem.* One of a series of compounds that contain the glyoxalin ring united with the benzene ring, the simplest member of which has the formula  $C_9H_6N_2$ . [**< BENZOZIN + GLYOXALIN-**] **Ben'zo'heth**, 1 ben'zo'hêth; 2 bën'zô'hêth, n. *Bib.* 1 **ben'zo-hiv**, iv, 20.  
**ben'zik**, 1 ben'zîk; 2 bën'zô'ie, a. *Chem.* Of pertaining to, or derived from benzoil, also benzoic acid.—**benzoic acid**, an aromatic compound ( $C_7H_6O_2$ ) contained in resins as benzoil, and in essences, putrid urine, coal-tar oil, etc., and obtained also by synthesis.—**b. alcohol**, an oily liquid ( $C_7H_6O$ ) contained in balsams, as tolu and Peru.—**b. aldehyde**, a thin oily liquid ( $C_7H_6O$ ). **Bitter almond oil**—**b. ether**, an oily liquid ( $C_7H_6O_2$ ) obtained by distilling an alcoholic solution of benzoic acid with hydrochloric acid.  
**ben'zo-in**, 1 ben'zo-zîn or -zoin; 2 bën'zo-zîn or -zô'in, n. 1. A gum resin. See **GUM**. 2. The spicebush (*Ben-zoin benzoïn*). 3. *Chem.* A crystalline compound ( $C_{14}H_{10}O_2$ ) obtained variously, as from benzoic aldehyde by the action of an alcoholic solution of potassium cyanid. 4. *Bot.* (1) [**B-**] A small genus of North-American and Asiatic shrubs or trees of the laurel family (*Lauraceæ*), the two American species being aromatic deciduous shrubs, with alternate, entire, feather-veined leaves and dioecious or polygamous honey-yellow flowers in lateral nearly sessile umbellate clusters appearing before the leaves. *B. benzoïn* and *B. mellissifolium* are the common and the hairy species respectively. (2) Any plant of this genus. [**< F. benjoïn**, **< Pg. benjoïn**, **< Ar. lubân jâvi**, incense of Java.]—flowers of benzoïn, same as **BENZOIC ACID**.  
**ben'zo-in-ate**, 1 ben'zo-zîn-ët; 2 bën'zo-zîn-ät, r. [**-AT'**ED: -AT'ING.] To impregnate or mix with benzoil or benzoic acid.  
**ben'zo-in'du-lins**, 1 ben'zo-in'du-lîn or -lînz; 2 bën'zo-zîn' du-lîn or -lînz, n. pl. See **INDULIN**.  
**ben'zo-ol**, 1 ben'zo-ol; 2 bën'zô'ol or -zô'l, n. 1. Same as **BENZENE**. 2. A coal-tar product obtained by mixing hydrocarbons of the benzene series: used as a cleanser and solvent, in color-manufacture, etc. The most important commercial benzols are the ninety per cent. **benzol** (containing approximately 70 per cent. benzene, 24 to 27 per cent. toluene, and small percentages of xylene, carbon disulfid, etc.), and the fifty per cent. **benzol** (containing larger percentages of toluene and xylene than the former). [**< BENZOZIN + OL**, *chem.*, allyl ben'zole?—**ben'zo-lat'ed**, a. *Pharm.* Combined or treated with benzol.  
**ben'zo-lin**, 1 ben'zo-lîn, -lîn or -lin; 2 bën'zo-zîn, -lîn or -zôn-lîn, -lîn, n. 1. A mixture containing hexane, heptane, octane, and other paraffins; petroleum spirit or ligroin. 2. Commercial benzene. 3. [**Rare.**] Amarin: formerly so called.  
**ben'zo-lize**, 1 ben'zo-laiz; 2 bën'zo-lîz, r. [**-LIZED**; -LIZ'ING.] To mix with, or cause to unite with, benzene or one of its derivatives. **ben'zo-lizet**.

2.

a new race of frost-giants after the first were drowned in the blood of the giant Ymer.

**Ber'gen**, *n.* 1. 1 ber'gen; 2 ber'gēn. A game played with dominoes. 2. A diocese in Norway; 14,812 sq. m. 3. A commercial fortified city, seaport, and extensive amt in Norway; 5 sq. m. 4. 1 ber'gen; 2 ber'gēn. A city; county-seat of the Prussian island Friggen, Baltic sea. 5. A county in New Jersey; 235 sq. m.; county-seat, Hackensack. 6. A village in Genesee county, N. Y.

**Ber'gen-feld**, 1 ber'gen-fild; 2 ber'gēn-feld, *n.* A borough in Bergen county, N. J.

**Ber'gen-op-Zoom**, 1 ber'hen-op-zōm; 2 ber'hēn-op-zōm, *n.* A town in North Brabant province, Netherlands; sieges, 1581, 1588, 1605, 1628, and 1747.

**Ber'gen Peak**. A mountain in Colorado; 9,555 ft. high.

**Ber'geri**, *n.* A curl of hair worn by women. [F.]

**Ber'ge-rac**, 1 ber'ja-rak; 2 ber'zhe-rac, *n.* 1. Savinien Cyrano de (1619-1655), an eccentric French poet and scientific writer; his large nose caused him many duels; *Le Pédant Joué*, etc. He is the hero of Rostand's metrical drama of the same name, in which he appears as a Quixotic Gascon soldier of fortune, who by his brilliant love-making gains for a dull and handsome companion the affection of Roxane, whom he himself secretly loves. The title rôle was played with great success by Coquelin aîné. 2. A town in Dordogne department, France.

**ber'gère**, 1 ber'jēr; 2 ber'zhēr, *n.* [F.] 1. A shepherdess. 2. A type of chair popular in the 18th century.

**Ber'ge-ron's dis-ease**, 1 ber'zhēr-ōn; 2 ber'hēn-ōn, *n.* A disease of the muscles, characterized by rhythmic movements, oscillatory and continuous; hysterical chorea. [rock.

**ber'g-fall**, 1 ber'fāl; 2 ber'hāl, *n.* [G.] An avalanche of Bergh, 1 bür; 2 bür, *Henry* (†1820-†1888). An American philanthropist; founded Society for Prevention of Cruelty to Animals, 1866.

**ber'g-haan**, 1 ber'hān; 2 ber'hān, *n.* [S.-Afr. D.] Any one of several South-African eagles; especially, the bateleur.

**Ber'g-haus**, 1 ber'hāus; 2 ber'hāus, *Heinrich* (†1797-†1854). A German geographer; *Physical Atlas*.

**Ber'hem**, *n.* Same as BERHEM.

**ber'gle**, 1 bür'gl; 2 bür'gl, *n.* [Orkneys.] The ballan-wrasse.

**Ber'g-man**, 1 ber'mān; 2 ber'mān, *Torbern Olof* (†1735-†1784). A Swedish chemist; naturalist.

**ber'g-man-nite**, 1 bür'g-mān-ait; 2 bür'g-mān-ait, *n.* Mineral. A variety of natrolite, formed by the alteration of other minerals. [*BERGMAN*].

**ber'g-mas'ter**, *n.* Same as BARMMASTER.

**ber'gmehl**, 1 ber'mel; 2 ber'mel, *n.* [G.] 1. An infusorial earth, sometimes eaten with meal or bark. 2. A white efflorescence of calcite, like cotton. **ber'g-meal**:

**ber'g-schot**, 1 ber'shot; 2 ber'hōt, *n.* [BERG-SCHOT-ITEN, pl.] [S. Afr.] A Highlander.

**ber'g-schurnd**, 1 ber'shūnt; 2 ber'hūnt, *n.* [G.] Geol. A crevasse or series of crevasses in the snow-field at the head of a glacier, near the base of the cliff against which the snow-field lies.

**Ber'g-son**, 1 ber'gān; 2 ber'gān, *Henri* (†1859-). A French philosopher; author: *Academical*. [*ALPENTOCK*].

**ber'g-stock**, 1 ber'stök; 2 ber'hōk, *n.* [G.] Same as **ber'g-till**, 1 bür'g-till; 2 bür'g-till, *n.* [G.] Geol. Boulders, stones, clay, mud, etc., carried and dropped by icebergs in lakes bordering an ice-sheet. [France.

**Ber'g-lake**, 1 ber'g; 2 ber'g, *n.* A city in Nord department, **ber'gut**, 1 bür'gut; 2 bür'gut, *n.* [Tatar.] The golden or other eagle used by Tatars in falconry. [*fan iceberg*.

*bish'op*, v. 1. [Eng.] To improve the appearance of (a horse) by fraudulent means, in order to secure a buyer. 2. To murder by drowning. [*Bishop*, proper name.]

*bish'op*, n. 1. *Ecl.* A spiritual overseer in the Christian Church. (1) In the Roman Catholic, Oriental, Anglican, Protestant Episcopal, and some other churches, a person admitted by episcopal consecration to the highest order of the ministry, with the power to administer ordination and confirmation, and exercising authoritative jurisdiction within his diocese or see, in supervision of the clergy and churches. See *ARCHBISHOP*; *CATHEDRAL*; *DIOCESE*; *SEE*. (2) In the Methodist Episcopal Church and some others, one who holds a superior office, but does not belong to a distinct order; an official elected, as by the General Conference, for life or for a term of years, to preside over conference, execute the laws of the church, etc.; a superintendent, as in the Lutheran Church. (3) In the Presbyterian, Congregational, and some other churches, any ordained minister who is settled over a parish, and thus has the spiritual oversight of a church. (4) In the Reformed Episcopal Church, an officer to whom is reserved ordination and confirmation, and the general oversight of ministers and churches: differing from the bishops of the Protestant Episcopal Church in being a presiding presbyter, rather than of a separate order, but, like the bishops of that church, claiming to be in historical succession. (5) In the Mormon Church, a judicial and administrative officer elected from the general priesthood. (6) In the English translation of the New Testament, a ruler or overseer in the church: used for the Greek word *episkopos*: applied in one instance to Christ (1 Pet. ii, 25), and sometimes used convertibly with *presbyter* or *elder* (Acts xx, 17 and 28). In the Roman Catholic Church, the *bishop* holds chief rank in the hierarchy and is always appointed by the Pope and usually nominated by the chapter. Bishops who govern a diocese, or diocesan bishops, enjoy ordinary jurisdiction, and are suffragan bishops to their metropolitan; titular bishops, or bishops in partibus as they were known prior to 1882, have no jurisdiction, but may be appointed coadjutor bishops, or assistants to a diocesan bishop, and are sometimes loosely styled auxiliary bishops; coadjutor bishops cum jure successione have the right of succession on the death of the diocesan bishop. In the Church of England, there are three classes of bishops: (1) diocesan, nominally elected by the chapter, but practically appointed by the crown; (2) suffragan, nominated by the crown; (3) assistant, appointed by the prelate. Coadjutor bishops may be appointed to all sees. In the Protestant Episcopal Church of the United States the bishop is elected by the diocesan convention, the election being afterward confirmed by at least two-thirds of the remaining bishops and "standing committees." Coadjutor bishops have right of succession, and in general convention of 1910 provision was made for suffragan bishops. In the United States the bishop is subject only to the general law of the church and holds no political status. The Anglican bishop takes the oath of allegiance to the sovereign and of canonical obedience to the metropolitan. The archbishops of Canterbury and York and 24 bishops in the order of seniority have seats in the House of Peers.

'Bishop,' a word as old as the introduction of Christianity into England, though not hiding its descent from *episcopos*, is thoroughly English. TARNER *Study of Words* lect. v, p. 164. [w. j. w.] The bishop's office is to oversee the flock; to number it, sheep by sheep; to be ready always to give full account of it.

		tavo....	7 x 10 1/2
		thirty-sixmo....	3 1/4 x 4

1. Medium octavo. 2. Broad quarto. Varies in size up to 10 x 13 inches. 3. Usually less than 7 x 8 1/2 inches.

Of the terms given above, *quarto*, *octavo*, and *duodecimo* are often written 4to or 8vo or 8°, and 12mo or 12°, and octavo and duodecimo are frequently spoken of as eighth and twelfth. The other terms are written as given or with the numeral followed by the suffix *-mo* or the degree-mark, as 36mo or 36°.

The measurements stated are by no means absolute, as the nomenclature varies in different countries and with different publishers. There are other designations sometimes used, as *imperial quarto* (15 in. by 11 in.) and *pot quarto* (7 1/4 in. by 6 1/4 in.).

For names of materials used to bind books, see *LIST* under *BOOKBINDING*.

**book**, n. 1. A number of sheets of paper bound or stitched together, whether blank, written, or printed, used for any purpose. Specif.: (1) A printed and bound volume of some bulk, as distinguished from a pamphlet.

In copyright law a *book* is any matter that is expressive of thought or intellectual conceptions clothed in language written, printed, or graven, and may consist of a single sheet, as of music. Its character and purpose are the test, not its size; consequently, the name does not extend to a business label, nor to a mercantile trade-mark.

The earliest book properly so called, is now generally believed to be the Latin Bible, commonly called the *Mazarin Bible* (1450 or 1452). *HALFAM Lit. Europe* vol. i, p. 167. [ss. & co. 1863.]

(2) A volume prepared for written entries or words; as, a *note-book*; *cash-book*; *day-book*. 2. A literary composition or treatise of some length; as, he is writing a *book* on Egypt; the books of the ancients were in the form of scrolls or tablets.

bot, 1 böt; 2 böt, n. 1. The larva of a bot-fly, parasitic in various vertebrate animals. See HORSE-BOT, SHEEP-BOT, etc. 2. A bot-fly. [*Cp. Gael. botus*, belly-worm, botleg, maggot.] bot'bee; bot'ti.

B. O. T., abbr. Board of Trade.

bot, abbr. See ABBREVIATION.

bot-tan'ic, 1 böt-tan'ik; 2 böt-tan'ic, I. a. Botanical; now used mostly in names of institutions; as, the Botanic Gardens at Kew. II. n. 1. A botanist. 2. pl. The science of plants. [*< LL. botanicus*, < Gr. *botanikos*, < *botanē*; see BOTANY.]

botan'ic, 1 böt-tan'ik; 2 böt-tan'ic, n. A botanical physician who prescribes only vegetable medicines in treatment of disease.

bot-tan'ic-al, 1 böt-tan'ik-al; 2 böt-tan'ic-al, a. Of or pertaining to botany; connected with the study or cultivation of plants.—bot-tan'ic-al-ly, adv.

bot'a-nist, 1 böt'a-nist; 2 böt'a-nist, n. A student of, or one versed in, botany.

Dr. Asa Gray was one of the two or three greatest botanists of his age. BYRON *Am. Commonwealth* vol. II, p. 631. [MACR. 1888.]

bot-a-nize, 1 böt'a-niz; 2 böt'a-niz, v. [-NIZED; -NIZ'ING.] I. t. To explore in search of botanical specimens or in the study of plant-life; as, to botanize an island. II. i. To search for plants for botanical purposes; study plant-life; make botanical investigations. bot'a-niz'er, 1 böt'a-niz'er; 2 böt'a-niz'er, n. A botanist.

bot'a-nol-o-gi, n. A botanist.

bot'a-nol-o-gy, n. Botany.

bot'a-no-man'cy, 1 böt'a-no-man'si; 2 böt'a-no-män'sy, n. Divination by plants. [*< Gr. botanē* (see BOTANY) + -MANCY.]

Bot'a-noph'a-ga, 1 böt'a-nof'a-ga; 2 böt'a-nof'a-ga, n. pl. *Mam.* A division of marsupials, comprising the herbivorous families. [*< Gr. botanē* (see BOTANY) + *phagē*, eat.]

bot'a-ny, 1 böt'a-ni; 2 böt'a-ni, n. [-NIZED; -NIZ'ING.] I. t. The science of the branch of biology, that treats of plants with reference to their structure, functions, development, analysis, nomenclature, and classification. The principal branches of botany are:—

Morphology, which deals with external form.

Histology, with the structure of tissues.

Cytology, with the cell.

Embryology, with the development of the egg-cell.

Physiology, with the functions and vital action of organs.

Phytopathology, with plant diseases.

Ecology, with environmental influences.

Phytogeography, with plant distribution.

Taxonomy, with the classification of plants.

Economic Botany, which includes Agriculture, Forestry, Horticulture, Pharmacognosy, Floriculture, and cognate subjects.

Paleobotany, which treats of fossil plants.

Botanical nomenclature, long a subject of controversy, now follows certain rules adopted by the International Botanical Congress held in Vienna in 1905. One name now end in distinct family names in -aceæ, specific names in -a, the earliest published, proper adjectives are decapitalized. See NOMENCLATURE.

The Chaldeans, Egyptians, and Greeks were the early cultivators of this science, although confusing its study with crude speculations as to the relations between animal and vegetable life. Aristotle, who devoted much attention to

the subject, divided plants into three classes—trees, shrubs, and herbs. Theophrastus wrote a history of plants describing about 500 species, and Dioscorides and the elder Pliny also wrote upon the subject. Otto Brunfels, a physician of Bern, in his *Herbarium* (Strassburg, 1530-1536) revived the science in Europe; he was followed by such writers as Leonhard Fuchs (*Historia Stirpium*, Basel, 1542), William Turner (*New Herball*, 1551), and others. Systematic botany was inaugurated by John Ray (*Methodus Plantarum*, 1682), and J. P. de Tournefort (1656-1708), who described 8,000 species. The science was greatly advanced by Linnæus (1707-1778), A. L. de Jussieu (1748-1836), and A. P. de Candolle (1778-1841), since which time the researches of a large number of experts have contributed to a wider knowledge of the various divisions of botany and of its comparative biological relations.

# BOTANICAL SIGNS.

⊙ An annual plant.	personal observation, or by the observation of the person to whose name the sign is attached.
⊙ A biennial plant.	
⊙ A perennial herb.	
⊙ An evergreen.	
⊙ A monocarpic plant.	? Of doubtful or questionable authority.
⊙ A plant having a woody stem.	° or f Foot or feet.
⊙ An undershrub.	' Inch or inches.
⊙ A shrub.	' Line (1/16 inch) or lines.
⊙ A large shrub.	[Sometimes European books give these as "feet," "inches," "lines"]
⊙ A tree.	
♂ or ♀ A staminate (male) plant or flower.	( Twisting or winding to the right.
♀ A pistillate (female) plant or flower.	( Twisting or winding to the left.
♂ A climbing-plant.	In describing the <i>Cristiferæ</i> the following are sometimes used:
♀ A perfect or hermaphrodite flower; or, bearing perfect flowers.	○ = Cotyledons accumbent, and radicle lateral.
♂ A naturalized plant.	○ = Cotyledons incumbent, and radicle dorsal.
♂ An ornamental plant.	○ > = Cotyledons conduplicate, and radicle dorsal.
♂ A useful plant.	○ > = Cotyledons folded twice (OJ) (i. thrice), and radicle dorsal.
♂ or ♀ Monoculous.	
♂ or ♀ ? Dioecious.	
♂ or ♀ ? Polygamous.	
∞ Indefinite as to number; numerous.	
0 Wanting as a part; none.	× Crossed with the sign of a hybrid.
! Certainly known, as from

*Syn.*: barrier, border, bound, bourn, bourne, confines, edge, enclosure, frontier, landmark, limit, line, marches, marge, margin, term, termination, verge. The boundary was originally the landmark, that which marked off one piece of territory from another. The bound is the limit, marked or unmarked. Now, however, the difference between the two words has come to be simply one of usage. As regards territory, we speak of the boundaries of a nation or of an estate; the bounds of a college, a ball-ground, etc. Bounds may be used for all within the limits, boundary for the limiting line only. Boundary looks to that which is without; bound only to that which is within. Hence we speak of the bounds, not the boundaries, of a subject, of the universe, etc.; as, the students were forbidden to go beyond the bounds. A barrier is something that bars ingress or egress. A barrier may be a boundary, as was the Great Wall of China. Bourn, or bourne, is a poetical expression for bound or boundary. A border is a strip of land along the boundary. Brahm, 1 brahm; 2 brahm, n. [If *Brahm* is masculine, the  
nominative singular is *Brahmā*; if neuter, *Brahma*.]  
[Sansk.] The absolute divine primordial essence;  
the supreme Soul of the Universe, self-existent, absolute,  
and eternal, from which all things emanate, and to  
which all return. *Brahm*, as the pervading spirit of the  
universe and divested of all quality and action, is an object  
of meditation, and the ultimate absorption in *Brahm* is  
the fundamental principle of Brahmanism. When domi-  
nated by activity, *Brahm* constitutes the Hindu Tri-murti,  
and is further manifested in *Brahmā*.

This supreme soul (*Brahm*) receives no worship. . . . It forms,  
however, the essence of Brahman, the creator and ruler of the  
world, or the phenomenal God, and in this sense even Brahman  
(neuter) is sometimes spoken of as the active Creator.

Brah'ma-na, 1 brahmāna; 2 brahmāna, n. [Sansk.] One  
of three main divisions of the Veda.

The Mantra portion consists of prayer and praise, mainly  
in metric hymns. See MANTRA. The Brahman portion

is a collection of ritualistic precepts, mainly in prose. The  
Upanishads contain mystical or secret doctrines. All three  
are *Śruti*, or revelation. The *Brahmanas* are intended, as  
their name implies, for the Brahmins, especially while con-  
ducting the complicated sacrificial ceremonies. Each of  
the *Saṁhitās* has its own Brahmanas. To the *Saṁhitā* portion  
of the *Rig-Veda* belong the *Altareya-B.* and the *Kau-  
shitaki-B.* (or *Saṁkhāyana-B.*). To the *Saṁhitā* portion  
of the *Yajur-Veda* belong the *Taittiriya-B.* and the *Sata-  
patha-B.*. To the *Sāmaveda* belong eight *B.*, the  
most important of which is the *Tandya* or *Prāchi* or *Pan-  
chavēda*, to which is added the *Shakadina*. To the *Athar-  
va-Veda* belongs the *Gopatha-B.* Dr. Haug would place  
the origin of the bulk of the Brahmanas between 1400  
and 1200 B. C.; Max Müller, between 800 and 600 B. C.

established in 1830 by Ram Mohun Roy and reorgan-  
ized in 1858 by his successor Keshub Chunder Sen.

This sect recognizes one personal and all-pervading God  
with whom every willing soul may have communion, and  
the universal presence and inspiration of the divine spirit,  
finds something divine in every form of religion, and rever-  
ences Christ, tho' it rejects the doctrines of his deity and of  
the atonement. It condemns polygamy, caste, idolatry,  
child-marriages, and intemperance. [< Hind. *brahma*

**tion**, n. The mechanism of a breech-loading gun.—**b.**  
**band**, n. *Harness*. Breeching. See **ILLUS.** under **HARNESS**.

**b-block**, n. The movable piece which closes the breech of  
 a breech-loading firearm, but is withdrawn to insert the  
 cartridge, and replaced before firing. In modern portable  
 firearms the block usually takes the form of a bolt and effects  
 closure of the breech by a sliding or rotating motion, or a  
 combination of both. In such arms and also in various  
 machine guns in which metallic cartridges are used, the con-  
 struction of the cartridges secures obturation. In cannon,  
 the block may be introduced transversely to the bore of the  
 gun, as in the Krupp system, or longitudinally therewith  
 by means of an interrupted screw. The variety of gun-blocks  
 and the specific means employed to open, close, or lock the  
 block, give rise to the various systems of breech-blocks.

**b-plug**, 1. *b-bolt*, n. Same as **BOLT**, n. 10.—**b-cloth

 same stock but of different parents.—**to b. true**, to produce  
 young habitually that are strictly of the parental type.

**breed**, n. 1. The progeny of one stock; specif., a race or  
 strain, especially of domestic animals or of cultivated  
 plants, that maintains characteristics artificially ac-  
 quired. The characteristics of a breed, having been ac-  
 quired through the interference of man, can alone be main-  
 tained or kept free from alien mixture by his constant con-  
 trol. The breed characteristics refer to similarity in general  
 appearance and are not necessarily traceable directly to an  
 ancestral individual, while *strain* generally implies a nar-  
 rower and more intensive meaning.

The struggle between the two fierce Teutonic breeds [Saxon and  
 Dane] lasted during six generations.  
 MACAULAY *England* vol. i, ch. 1, p. 8. (p. s. & co. 1849.)

**bro'm-**, 1 bro'm; 2 bro'm; 3 bro'm, *n.* From **BROMINE**, combining forms used mostly in names of chemical compounds in which bromine is a principal element.

Words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

**bro'ma**, 1 bro'ma; 2 bro'ma, *n.* 1. The dry powder of cacao-seeds after a thorough expression of the oil; also, the beverage prepared therefrom. See **CHOCOLATE** and **COCOA**. 2. *Med.* Solid food. [**Gr. brōma**, food, < *bibrōskō*, eat.]

**bro'ma**, 1 bro'ma; 2 bro'ma, *n.* [Sp.] A ship-worm.

**bro'ma-c'e-tate**, 1 bro'ma-c'e-tate; 2 bro'ma-c'e-tate, *n.* Same as **BROMO-ACETATE**, etc.

**bro'mal**, 1 bro'mal; 2 bro'mal, *n.* *Chem.* A colorless liquid compound (CBr<sub>3</sub>COH) resembling chloral, with a pungent taste and penetrating odor: obtained by the action of bromine on alcohol.

**bro'ma-ld**, 1 bro'ma-ld; 2 bro'ma-ld, *n.* *Chem.* A compound based on bromine as chloral is on chlorine. [**BROM-IN** + *-ald* in **CHLORAL**.]

**bro'ma-lin**, 1 bro'ma-lin; 2 bro'ma-lin, *n.* *Pharm.* Hexamethylenetetramine-ethylbromide (CH<sub>2</sub>)<sub>6</sub>N<sub>4</sub>C<sub>2</sub>H<sub>5</sub>Br; a sedative compound used in epilepsy. [**BROMIN**.]

**bro'ma-li-um**, 1 bro'ma-li-um; 2 bro'ma-li-um, *n.* Same as **BROMOLITHIUM**.

**bro'ma-lin**, 1 bro'ma-lin; 2 bro'ma-lin, *n.* A yellow crystalline compound (C<sub>12</sub>H<sub>11</sub>BrO<sub>2</sub>) obtained from barbaloin by the action of bromine. [**BROMIN** + **BARBALOIN**.]

**bro'ma-lin**, 1 bro'ma-lin; 2 bro'ma-lin, *n.* A yellow crystalline compound (C<sub>12</sub>H<sub>11</sub>BrO<sub>2</sub>) obtained from barbaloin by the action of bromine. [**BROMIN** + **BARBALOIN**.]

**bro'ma-n'il**, 1 bro'ma-n'il; 2 bro'ma-n'il, *n.* *Chem.* A derivative of quinine similar to chloranil, but with bromine instead of chlorine. [**BROM-IN** + *-anil* in **CHLORANIL**.]

**bro'ma-r'gy-rite**, 1 bro'ma-r'gy-rite; 2 bro'ma-r'gy-rite, *n.* Same as **BROMITE**.

**bro'mate**, 1 bro'mate; 2 bro'mate, *nt.* [**BROMATE**; **BROMATE-ION**.] To combine, saturate, or impregnate with bromine.

**bro'mate**, *n.* *Chem.* A salt of bromic acid.

**bro'ma-to-graphy**, 1 bro'ma-to-graphy; 2 bro'ma-to-graphy, *n.* *Med.* A scientific account of food. [**Gr. brōma** (to) food (see **BROMA**), + *-graphy*.]

**bro'ma-to-logy**, 1 bro'ma-to-logy; 2 bro'ma-to-logy, *n.* 1. Bromatology. 2. The science of alimentation. [**Gr. brōma**, food (see **BROMA**), + *-ology*.]—**bro'ma-to-gist**, *n.*

**bro'ma-tox'ism**, 1 bro'ma-tox'ism; 2 bro'ma-tox'ism, *n.* *Pathol.* A toxic condition caused by excessive or improper food. [**Gr. brōma**, food, + *toxikon*; see **TOXIC**.]

**bro'm-berg**, 1 bro'm-ber; 2 bro'm-ber, *n.* A town in Poland.

**bro'me**, 1 bro'm; 2 bro'm, *n.* Same as **BROMIN**; generally in composition; as, *bro'me-benzol*.

**Bro'me**, *n.* 1. Richard (—1652), an English dramatist; Northern Lass, etc. 2. A district in Quebec, Canada; 835 sq. m.; capital, Knowlton.

**bro'me-grass**, 1 bro'm-gras; 2 bro'm-gras, *n.* Any grass of the genus *Bromus*. *B. inermis*, an awnless European perennial, 2 to 5 ft. high, with creeping rootstocks and open panicles 5 to 7 in. long, has been introduced and cultivated in many parts of the United States for hay under the name of **smooth brome** or **Hungarian brome-grass**. [**Gr. bromos**, kind of oats] + *-grass*.]

**bro'me-lia**, 1 bro'me-li-a; 2 bro'me-li-a, *n.* *Bot.* A small tropical American genus of hot-house herbaceous perennials allied to the pineapple and type genus of the *Bromeliaceae*, with dense panicles of flowers which have a 3-parted corolla, a calyx of 3 sepals, succeeded by a large yellowish berry. *B. pinguin* is the pinguin or wild pine of Jamaica. See **PINGUIN**. [**Olaf Bromel**, Swedish botanist.]

**bro'me-li-a**, 1 bro'me-li-a; 2 bro'me-li-a, *n.* *pl.* *Bot.* A family of tropical or subtropical American epiphytic, saxicolous or rarely terrestrial, monocotyledonous plants—the pineapple family—with rigid, channeled, often scurvy and spiny leaves and showy flowers; bromelworts. It embraces about 35 genera and 900 species. *Ananas sativus*, the pineapple, and *Tillandsia usneoides*, the Spanish moss, are among the best known. [**Olaf Bromel**, Swedish botanist.]—**bro'me-li-a-ceous**, *a.*—**bro'me-li-ad**, *n.* Any plant of the pineapple family. **bro'me-li-wort**; **bro'me-wort**.

**bro'me-lin**, 1 bro'me-lin; 2 bro'me-lin, *n.* *Chem.* An enzyme occurring in pineapple juice; it converts albuminous matter into proteoses.

**bro'meth'y-lene**, 1 bro'meth'y-lin; 2 bro'meth'y-lin, *n.* *Chem.* Vinyl bromide (C<sub>2</sub>H<sub>3</sub>Br).

**bro'm-gras**, 1 bro'm-gras; 2 bro'm-gras, *n.* [S.-Afr. D.] **bro'm-hydrate**, 1 bro'm-hydrat; 2 bro'm-hydrat, *n.* Same as **HYDROBROMATE**.—**bro'm-hydrile**, *a.* Same as **HYDROBROMATE**.

**bro'm-hydrin**, 1 bro'm-hydrin; 2 bro'm-hydrin, *n.* *Chem.* A compound like chlorhydrin, in which bromine is substituted for chlorine. Compare **CHLORHYDRIN**.

**bro'm-ia**, 1 bro'mi-as; 2 bro'mi-as, *n.* [**BROMI-A**; **DES**, 1 bro'ma-liz; 2 bro'ma-liz, *pl.*] [**Gr.**] **Archeol.** A cup resembling the scyphus, but larger.

**bro'mic**, 1 bro'mik; 2 bro'mic, *xiii*, *a.* *Chem.* Of, pertaining to, or containing bromine, especially in its higher valence.—**bromic acid**, a liquid compound (HBrO<sub>3</sub>) formed by treating bromine water with chlorine.—**b. silver** (*Mineral*), same as **BROMYTRITE**.

**bro'mid**, 1 bro'mid; 2 bro'mid, *n.* 1. *Chem.* A compound of bromine with an element or an organic radical; a salt of hydrobromic acid; as, potassium bromide. The bromides are of considerable importance in the arts as well as in medicine. 2. A photograph printed on paper, porcelain, etc., that has been subjected to the effects of bromide of silver.—**acid bromide** (*Chem.*), a compound produced by the union of bromine with an acid, such as acetyl bromide, an emulsion, a silver nitrate solution, containing also potassium iodide and bromide.—**b. paper** (*Phot.*), a paper which has been subjected to a coat of gelatin saturated with silver bromide: used in contact printing.—**silver b.**, a sensitive salt of silver used in photographic emulsions, for plates and developing papers.

**bro'mide**, 1 bro'mid; 2 bro'mid, *n.* [Slang, U. S.] One who utters platitudes; a commonplace bore.—**bro'mid-ly**, *a.* [Recent.] Commonplace; inevitable; obvious; sedative.

**bro'mid-ion**, 1 bro'mid-ion; 2 bro'mid-ion, *n.* *Chem.* Ionic bromine. See **ION**. [**BROMIN** + *-ion*.]

**bro'mi-dro'sis**, 1 bro'mi-dro'sis; 2 bro'mi-dro'sis, *n.* *Pathol.* A disorder of the sweat-glands, attended by fetid perspiration. [**Gr. brōmos**, stench, + *hidrōs*, sweat.]

**bro'min**, 1 bro'min; 2 bro'min, *n.* 2 bro'min, *n.* From **BROMINE**, combining forms used mostly in names of chemical compounds in which bromine is a principal element.

Words beginning with these prefixes will be found in alphabetical place, either singly or in groups.

cially it is prepared from bitter. It forms a brownish vapor which is extremely irritating to the eyes and mucous membranes. When dropped on the skin it forms sores which heal with difficulty and it is very poisonous when swallowed. Its most important antidotes are magnesia, white of egg, and starch-water. Chemically the element acts like chlorine and unites directly with the elements to form bromides. It is used in synthetic chemistry, medicine, and the color industry. See **ELEMENT**. [**F. brome**, < *Gr. brōmos*, stench.] **brome**.

**bro'mi-nate**, 1 bro'mi-nat; 2 bro'mi-nat, *nt.* Same as **BROMATE**.—**bro'mi-na-tion**, *n.*

**bro'mi-os**, 1 bro'mi-os; 2 bro'mi-os, *n.* Same as **DIONTSOS**.—**bro'mi-us**, *a.*—**bro'mi-an**, *a.* & *n.*—**Bromian drink**, wine.

**bro'mi-pin**, 1 bro'mi-pin; 2 bro'mi-pin, *n.* *Chem.* A yellow oily liquid prepared in concentrations of 10 and 33 1/3 per cent. brominated sesame-oil and administered in epilepsy. [**BROMIN**.]

**bro'mis'm**, 1 bro'mis'm; 2 bro'mis'm, *n.* *Pathol.* Poisoning from excessive use of bromine or bromids. Its chief symptoms are an eruption of the skin accompanied by decrease in muscular power and mental activity. **bro'min-is'm**.

**bro'mite**, 1 bro'mit; 2 bro'mit, *n.* *Mineral*. Same as **BROMYTRITE**.

**bro'mize**, 1 bro'miz; 2 bro'miz, *tr.* [**MIZED**; **MIZ-ING**.] To combine, impregnate, or treat chemically with bromine or a bromide; as, to bromize collodion in photography. **bro'mis'e**.—**bro'mi-za'** [*or* *-sa'tion*], *n.*

**Brom'ley**, 1 brom'li; 2 brom'li, *n.* 1. Sir Thomas (1530–1587), an English Lord Chancellor; presided at the trial of Mary Queen of Scots. 2. A market-town in Kent, England.

**brom'life**, 1 brom'lit; 2 brom'lit, *n.* *Mineral*. A barium-calcium carbonate, (Ba,Ca)CO<sub>3</sub>, white to gray and pink, having a vitreous luster, and crystallizing in the orthorhombic system. [**Bromley Hill**, England.] **alston-ite**.

**brom'ling**, 1 brom'ing; 2 brom'ing, *n.* Designating a sound made by the brom-vogel. [**IMITATIVE**.]

**bro'mo-a-c'e-tate**, 1 bro'mo-a-c'e-tate; 2 bro'mo-a-c'e-tate, *n.* A salt of bromo-acetic acid. **bro'mo-a-c'e-tic**, *a.* Of or pertaining to bromine and acetic acid; as, *bromo-acetic acid*, a crystalline compound (CH<sub>2</sub>Br.CO<sub>2</sub>H) formed by the bromination of acetic acid.—**bro'mo-ben'zene**, *n.* *Org. Chem.* A bromine substitution product of benzene, obtained by straight bromination or other process; specif., a colorless oily liquid (C<sub>6</sub>H<sub>5</sub>Br).—**bro'mo-bo'rate**, *n.* *Chem.* A double hydrobromic and boric acid salt.—**bro'mo-form**, *n.* *Chem.* An oily liquid compound (CHBr<sub>3</sub>) resembling chloroform, obtained by the action of bromine on alcohol in the presence of an alkali.—**bro'mo-for'malin**, *n.* Same as **BROMALIN**.

**bro'mo-gel'a-tin**, *a.* Pertaining to or made from a mixture of bromide, silver nitrate, gelatin, as a photographic emulsion. **bro'mo-gel'a-tine**.

**bro'mo-gra'phy**, 1 bro'mo-gra'fy; 2 bro'mo-gra'fy, *n.* Same as **BROMATOGRAPHY**.

**bro'mo-i'o-dism**, 1 bro'mo-i'o-diz; 2 bro'mo-i'o-diz, *n.* *Pathol.* Poisoning resulting from excessive use of bromine and iodine or their compounds.—**bro'mo-i'o-dized**, *a.* Treated or charged with a mixture of iodides and bromides.

**bro'mol**, 1 bro'mol or -mol; 2 bro'mol or -mol, *n.* *Chem.* Tribromophenol as an antiseptic and disinfectant. [**BROM** + *-ol* in **TRIBROMPHENOL**.]

**bro'mo-ma-ni-a**, *n.* *Pathol.* Mania resulting from the excessive use of bromine.—**bro'mo-pi'erin**, *n.* *Chem.* A colorless pungent explosive liquid (CNO<sub>2</sub>Br) corresponding to and resembling chloroplatin.

**Bromp'ton**, 1 bromp'ton; 2 bromp'ton, *n.* A district in S. W. London, England.

**Brom's-grove**, 1 bromz'grōv; 2 bromz'grōv, *n.* A market-town in Hampshire, England.

**bro'mus**, 1 bro'mus; 2 bro'mus, *n.* *Bot.* A large genus of grasses—the brome-grasses—having the rather large spikelets, usually awned, in lax panicles. *B. scaberrimus* is the chess or cheat. [**Gr. bromos**, kind of oats.]

**būsh**, *el*, *n.* 1. A dry measure of 8 gallons or 4 pecks. From Anglo-Saxon times the Winchester bushel of 2,150.42 cubic inches was the standard of measure, and a standard bushel was preserved in the town hall of Winchester: it has remained the standard dry measure in the United States, and contains 77.627 pounds of water. The Imperial b. of Great Britain was established by law in 1826, and holds 80 pounds of water, or 2,218.92 cubic inches. The Scotch b. was the equivalent of 1 1/2 Winchester bushels. For factors of conversion into metric measures see METRIC.

The following are minimum weights per bushel of certain articles of produce according to the laws of the United States: dried apples, 20 pounds; barley, 48; beans, 60; bran, 20; buckwheat, 48; clover, 60; corn, 56; corn in the ear, 70; corn meal, 48; flaxseed, 56; grass seed, 44; hemp seed, 44; malt, 34; oats, 32; onions, 57; dried peaches, 33; peas, 60; potatoes, 60; rye, 56; salt (coarse), 80 in Pennsylvania and 50 in Illinois; salt (fine), 62 in Pennsylvania and 55 in Illinois and Kentucky; wheat, 60.

In Great Britain the bushel for various commodities is reckoned in pounds, as follows: — barley (English), 52 and 56; barley (French), 52 1/2; oats (English), 42; oats (foreign), 38; wheat (English), 63; wheat (foreign), 62; the Covent Garden bushel basket for fruit is 17 1/2 inches in diameter at top, 10 inches at the bottom and 10 inches deep.

*Syn.* affair, avocation, barter, calling, commerce, concern, craft, duty, employment, job, occupation, profession, trade, transaction, vocation, work. A business is what one follows regularly; an occupation is what he happens at any time to be engaged in; trouble-shine may be one's occupation for a time, as a relief from business; business is ordinarily for profit, while the occupation may be a matter of learning, philanthropy, or religion. A craft is some occupation requiring technical skill or manual dexterity, or the

persons, collectively, engaged in its exercise; as, the weaver's craft. A profession implies scholarship; as, the learned professions. Pursuit is an occupation which one follows with ardor. An avocation is what calls one away from other work; a vocation, or calling, that to which one is called by some special fitness or sense of duty; thus, we speak of the gospel ministry as a vocation or calling, rather than a business. Trade or trading is, in general, the exchanging of one thing for another; in the special sense, a trade is an occupation involving manual training and skilled labor; as, the ancient Jews held that every boy should learn a trade. A transaction is a single action, whether in business, diplomacy, or otherwise; affair has a similar but lighter meaning; as, this little affair; an important transaction. The plural affairs has a distinctive meaning, including all activities in which men deal with one another on any considerable scale; as, a man of affairs. A job is a piece of work viewed as a single undertaking, and ordinarily paid for as such. Trade and commerce may be used as equivalents, but trade is capable of a more limited application; we speak of the trade of a village, the commerce of a nation. Barter is the direct exchange of commodities; business, trade, and commerce are chiefly transacted by means of money, bills of exchange, etc. Business, occupation, etc., may be what one does independently; employment may be in the service of another. Work is any application of energy to secure a result, or the result thus secured; thus, we speak of the work of God. See *DUTY*. — *Prep.* the business of a druggist; in business with his father; doing business for his father; have you business with me? business in New York; business about, concerning, or in regard to certain property.

3. To be busy; occupy oneself. [*< AS. bysian, < byst, active.*] *Syn.* see *OCCUPY*. *bust-y*, *a.* [*Bu-si-er; bu-si-er.*] 1. Actively engaged in something that engrosses the attention; constantly or habitually occupied, as in some employment; devoted to business; as, a busy housewife; busy in God's service.

It is possible that the word *busy* may have its root of origin in the production of the great bustling world which may be called the ushering of the word.

*Enam. Philol. Eng. Tongue* 4 10, p. 90, [i. n. 1873.] 2. Constantly active; as, busy tongues, feet, or hands. 3. Temporarily engaged; not at leisure. 4. Officially active; prying; meddling; as, a busy gossip. 5. Marked by or pertaining to active, continuous work or duty; filled with business; as, a busy day. 6. Telephone. Engaged; said of a line or number. 7. Anxious; requiring care. [*< AS. bysian, active.*] *Des'ty*.

*Syn.* active, diligent, employed, engaged, industrious, occupied. *Busy* applies to an activity which may be temporary; *industrious* to a habit of life. We say a man is busy just now; that is, occupied at the moment with something that takes his full attention. It would be ridiculous or satirical to say, he is industrious just now. But *busy* can be used in the sense of *industrious*, as when we say he is a busy man. *Diligent* indicates also a disposition which is ordinarily habitual, and suggests more of heartiness and volition. *Industrious* is a word which is a different, rather than an *industrious*, reader of the Bible. In the use of the nouns, we speak of plodding industry, but not of plodding diligence. See *ACTIVE*. Compare *AS-INDUITY*. — *Ant.* careless, dilatory, dull, idle, inactive, indolent, lazy, listless, negligent, remiss, slack, slothful. — *Prep.* busy at work; about

2. [Colloq.] To flatter fulsomely. 3. In gambling, to increase, as one's bet, by the addition of one's previous winnings.

**but/ter**, 1. The fatty constituent of milk, especially cow's milk, from which it is commonly separated by agitation, as in churning; largely used in the household economy as an article of food. In the domestic manufacture of **butter** the cream is collected and set aside until sour, that is, until lactic fermentation has been set up. When this is sufficiently advanced the cream is placed in a churn. When the churn is churned the butter is produced by agitation with the dasher. In dairies and large establishments churning is accomplished by machinery. The crude **butter** secured by churning is subjected to washing and seasoning processes in order to prepare it for the market. The washing or working of **butter** is accomplished by means of water. The object of this working is to separate from the crude **butter** as much of the curd and other non-fatty constituents of the cream as can be conveniently removed. According to the standard established by the authority of Congress **butter** must not contain more than 16 per cent. of water and not less than 82.5 per cent. of **butter** fat. H. W. WILDER *Food and Their adulteration* pp. 182-186. In N. W. C. 111.

The word **butter** is in use in various terms describing dairy implements and products, or otherwise relating to **butter**; as, **butter-bowl**, **b-carrier** (a box for conveying ball butter unaltered), **b-cow**, **b-crock**, **b-dairy**, **b-extractor** (for extracting **butter** from fresh milk), **b-flickin** (sometimes a definite measure), **b-knife**, **b-knife**, **b-knife** (a butter-man (a butter-dealer), **b-mold**, **b-print**, or **b-stamp** (for molding or stamping **butter**), **b-paddle**, **b-pat**, **b-rations** (given to cows to enrich the milk), **b-tongs**, **b-tub**, **but/ter-wife** or **b-woman** (a woman who makes or sells **butter**), **b-worker** (machine), **creamery** **b.** (made at a creamery), **dairy** **b.** (made at a private dairy).

*by*, *prep.* 1. Expressing relations of place or direction: (1) Alongside of; next to; near; as, "I dwell by the Capitol." SHAKESPEARE *Julius Caesar* act iii, sc. 3. (2) Along the line of; beside; past; over (a course); as, they walked along by the river; the boat went by them.

The way to God is by the road of men.

EDWIN ARNOLD *Light of the World* bk. v, p. 225. [*fr.* a. w.]

2. Expressing the relation of agency, cause, means, or instrument: (1) Through the agency or means of; through; with; as, the rope hangs by a thread; he crossed the river by the bridge; he died by poison.

For we walk by faith, not by sight. *2 Cor.* v, 7.

(2) Through the direct action of; through the help of; as, he was helped by his father.

The distinction of the two particles in the modern language consists essentially in that *by* is referred to the object immediately operative as the independent bearer of the activity; with, on the other hand, to an object mediately operative, and participating in the activity. *MATTHEW* *Eng. Gram.* tr. by Grece, vol. ii, p. 414. [*fr.* *aver*, 1874.]

No one was ever yet made utterly miserable excepting by himself. *J. LUBBOCK* *Pleasures of Life* ch. i, p. 13. [*fr.* a. 1857.]

(3) In accordance with; according to, taking, or regarding as a standard; as, they work by the month.

It was one by the village clock.

LONGFELLOW *Wayside Inn*, *Paul Retere's Ride* st. 11.

(4) *Naut.* One point toward; as, to sail west by north.

3. Expressing relations of quantity: (1) To the extent, number, or amount of; as, they swarmed by hundreds; to reduce by half. (2) [North. Eng. & Scot.] More than; reaching beyond; in excess of. 4. Expressing relations of time; not later than; in the time of; during; as, come by ten o'clock; the moon shines by night. 5. Expressing possession; in possession of; with; as, he came honestly by it; there was no money by him. 6. Expressing order, arrangement, etc.: (1) In connection with; alongside of; arranged with or in. (2) Multiplied into; in connection or measurement with; as, six by eight. 7. Expressing the relation of an action to its object: (1) With regard to; for; to; as, to do well by one. (2) [Archaic.] Against; derogatory to.

I know nothing by myself [against, R. V.].

This idiomatic use of *by*, as equivalent to "concerning," but with also a suggestion of "against," was not peculiar to our Translators. *FRENCH Select Glossary* p. 37. [*fr.* a. c. 1890.]

8. In the name, presence, or view of; as, in oaths or adjurations; as, by the gods. [*< AS. bi, big*] *byef*.

*Syn.* by means of, through, with. *By* refers to the agent; *through*, to the means, cause, or condition; *with*, to the instrument. *By* commonly refers to persons; *with*, to things; *through* may refer to either; hence *by* is properly used before the agent or doer, *with* before the instrument or means; as, "He was killed by the assassin with a dagger." But active forces are often thought of as agents, so that we properly say "The house was destroyed by fire." "His friends were displeased by the selection of another chairman" means that the action displeased them; "his friends were displeased with the selection," etc., means that the man selected was not their choice. The road having become impassable through long disuse, a way was opened by pioneers with axes. *By* may, however, be applied to any object which is viewed as partaking of agency, and *with* may be used before the agent or doer, as skill is gained by practice. We speak of communicating with a person by letter. *Through* implies a more distant connection than *by* or *with*, and more intervening elements. Material objects are perceived by the mind through the senses. See *AT*.

—*by all means*, certainly; on every account.—*by north*, south, east, northeast, etc. (*Naut.*), with deflection toward the north, etc.; as, our course was northeast by east, i. e., between northeast and east; used in navigation or boating.—*by oneself*, alone; apart; unassisted.

—*by the ears*, in disagreement; at variance; commonly in the phrase *to set by the ears*. See under *EAR*.—*by the head or stern* (*Naut.*), drawing most water forward or aft; said of a vessel.—*by the run* (*Naut.*), entirely and at once; as, to let go *by the run*.—*by the way*. 1. On or beside the road. 2. Incidentally; by the by.—*by trade*, n. The exercise of, or professing, a trade, as, a tailor *by trade*.—*by day*, *adv.* One by one, piece by piece, each day, one, or piece, as the case may be, individually and separately.—*to come by*, to acquire.—*to set store by*, to esteem; hold as valuable or of worth.—*to stand by*, to stand up for; support.

**Caes** 'al-plin'a-cc-e, 1 ses'al-plin'a-cc-e; 2 çes'al-plin'a-cc-e, n. pl. Bot. 1. A family of trees, shrubs, or herbs—the brazil-tree or senna family—formerly included in the family *Leguminosae*, but separated from it by modern botanists on account of its flowers, which have nearly regular corollas, with the upper petal enclosed by the others and the stamens distinct. It embraces about 90 genera and 1,000 species, mostly tropical. Four or five genera, including *Cercis*, *Cassia*, *Gymnocladus*, and *Gleditsia*, are represented in the eastern United States by the Judas-tree, the Maryland senna, the Kentucky coffee-tree, and the honey-locust, respectively. 2. Formerly a subfamily, tribe, or suborder of the *Leguminosae* according to many botanists, some of whom designated it variously as *Casapintaceae*, *Casapintaceae*, and *Casapintoidae*. [*< Andreas Casapintus*, Italian botanist.] — **caes** 'al-plin'a-cc-eus, a.

A Calash.

stone; stony; gritty; *as*, a *calculus* deposit. 2. *Med.*  
Resembling, pertaining to, or affected with *calculus*.

[< L. *calculus*, < *calculus*, pebble; see CALCULUS.]  
**cal'cu-lose**, 1 kal'ku-lus; 2 cäl'cū-lūs, n. [-L, 1-lai; 2-li, pl.] 1. *Pathol.* A concretion formed in various parts of the body, as the kidneys, gall-bladder, joints, etc., resembling a pebble in hardness. A biliary calculus is one connected with the biliary passages; a hepatic c. is one found in the liver; a cystic c. is one found in the gall-bladder. For others see below.  
 2. *Math.* Any method of calculating or investigating by algebraic symbols.

While *calculus* is sometimes used in this wide sense, it is commonly used, without a qualifying word, for the *infinitesimal calculus*, and includes *differential calculus* and *integral calculus*. See phrases below.

3. *Logic.* Inference from propositions or hypotheses indicated and treated algebraically. 4. [Rare or Obs.] A reckoning; calculation. [L., dim. of *calz* (calc-), stone.]

—**alternating calculus**, a calculus formed in one of the urinary organs, consisting of successive layers of different chemical composition. —**alvine calculus**, concretions due to the thickening and drying of portions of feces in the intestine. —**arthritic c.**, a pebble concretion in the capsules of the joints, as in gout and like diseases. —**barycentric c.** (*Math.*), a geometrical method in which weight as well as position is assigned to a point. —**c. of enlargement** (*Math.*), a method of ascertaining algebraic developments or the like, in the calculus of finite differences, by the use of various symbols of operation, as E, A, and Σ. —**c. of extension**, a calculus for space-analysis, invented by Grassmann. —**directional c.** —**c. of finite differences**, the branch of analysis that treats of the ratios of finite corresponding increments of mutually dependent quantities. —**c. of fluxions**, or **fluxionary c.**, a form of the infinitesimal calculus used by Sir Isaac Newton, based on the conception of fluxions. —**c. of forms**, the theory of invariants or the like presented symbolically after the method of Jordan. —**c. of functions**, a method of finding functions that shall fulfil given conditions. —**c. of imaginaries**, algebra of two dimensions in which the so-called imaginary unit  $\sqrt{-1}$  is used. —**c. of limits**, a method of proof by testing the convergence of a series satisfying a differential equation by comparison with another series known to be convergent and formed similarly from another differential equation. —**c. of operations**, that branch of analysis which treats of the laws governing the combinations of symbols of operation. —**c. of probabilities**, the mathematical method founded on the theory of probabilities. —**c. of variations**, that branch of analysis which inquires what form a function must take in order that some quantity depending upon it may be a maximum or minimum. —**coral c.**, a calculus having a branched form caused by its being a cast of the pelvis and calices of the kidney. —**differential c.**, that branch of analysis which investigates the infinitesimal changes of quantities when the relations between the quantities are given. —**exponential c.** 1. The discussion and interpretation of exponents as a branch of algebra. 2. The division of infinitesimal calculus in which the exponential functions are treated. —**hedonic c.** 1. A proposed method of applying mathematics to the deduction of particular consequences from certain assumed principles of ethics or economics. 2. A calculus in which a certain hypothetical quantity of eudemonistic good is made the unit of measurement. —**c. of pleasure**. —**hemp-seed c.**, a small smooth calculus of calcium oxalate in or near the kidneys. —**infinitesimal c.**, the principles of reasoning by the use of symbols representing the infinitesimal increments or variations of quantities, comprehending the differential and integral calculus. —**integral c.**, that branch of analysis which, from the relations among the infinitesimal changes or variations of quantities, deduces relations among the quantities themselves. —**intestinal c.** (*Vet.*), a dust-ball. —**nephritic or renal c.**, a concretion formed in the kidney. —**seal c.**, a calculus dealing with seals, or portions, of straight lines. —**urinary c.**, a concretion formed in the urinary passages; the stone.

**cal'cu-me-ter**, 1 kal'kü-mi-tēr; 2 cal-cū-me-ter, n. A form of adding-machine.

**Cal-cut'ta**, 1 kal'kut'tā; 2 cäl-cūt'tā, n. A commercial and manufacturing city, on the Hugli river, capital of Bengal; captured from the British by Surajah-ud-daula, 1756; prisoners kept in the "Black Hole"; recaptured by Clive after 7 months. Capital of India till 1911.

**cal'd**, pp. Called. S. S.

**Cal-da'ra**, 1 kal'dā-rā; 2 cäl-dā-rā, Polidoro (1492-1543). An Italian painter; sometimes called Caravaggio, from his birthplace; murdered at Messina by his servant.

**cal-da'ri-um**, 1 kal'dā-rī-um; 2 cäl-dā-rī-um, n. [-rit-a, pl.] [*L.* *Rom. Antiq.*] A room for the hot bath in a bathing-establishment.

**Cal'das**, 1 käl'dās; 2 cäl'dās, n. A department of Colombia; 7,380 sq. m.; capital, Manizales.

**Cal'dees**, n. pl. Bib. Same as CHALDEES.

**Cal'der**, 1 käl'dēr; 2 cäl'dēr, St. Robert (1745-1818). A British admiral; fought indecisive action against French and Spanish fleet, July 22, 1805, which frustrated Napoleon's intended invasion of England.

**cal-de'ra**, 1 kal'dē-rā; 2 cäl-dē-rā, n. [*Sp.*] 1. *Geol.* A large, roughly circular depression, in many cases with a partially broken-down rim, formed by the explosive disruption of a volcanic cone, or by the collapse of a crater-floor. 2. A large caldron. *chal-de'ra*.

**Cal'de-ra'ri**, 1 käl'dē-rā-rī; 2 cäl'dē-rā-rī, n. pl. A Neapolitan secret society formed to oppose the revolutionary Carbonari, before the restoration of the Bourbons in 1815. [*It.*, pl. of *calderaro*, coppersmith, < *caldara*, < *L. caldaria*; see CALDARA.]

**Cal'de-ra-ro**, 1 -ro; 2 -rō, n. [*It.*] A member of the Caldarari. See CALDERARI and CARBONARO.

**cal'de-ril'lay**, 1 käl'dē-ril'ya; 2 cäl'dē-ril'ya, n. [*Sp.*] The current; also applied to any Spanish copper coin current among Spanish peoples.

**cal'der-ite**, 1 kal'dēr-ait; 2 cäl'dēr-it, n. *Mineral.* A variety of garnet.

**cal'de-ron de la Bar'ca**, 1 kal'dā-rōn dē la bār'cā; 2 cäl'dē-rōn dē la bār'cā, Pedro (1716-1800-1818). A Spanish dramatist.

**cal'dese't**, n. To cheat; more correctly, *chaldeise*.

**Cal'dew-gate**, 1 käl'dū-gēt; 2 cäl'dū-gāt, n. A suburb of Carlisle, Cumberland, England.

**cal'drife**, a. Cauldrite. See CAULDRIF.

**cal'dron**, 1 käl'drōn; 2 cäl'drōn, n. [*Rare.*] To place or enclose in a caldron.

**cal'dron**, n. 1. A large kettle or boiler. 2. Any object shaped like a caldron or represented as similar to a caldron of boiling liquid. [*ME.* *caudron*, < Old Norman *F. caudron*, = OF. *chaudron*, aug. of *caudiere*, < *L. caldaria*, < *calidus*, hot, < *calo*, be hot.] *cauf'dron*; -*cal'dron*-*bot'tom*, n. A cast of a vertical, Sillaridol, tree-trunk above or below a coal-bed. Same as KETTLE-BOTTOM.

**Cald'well**, 1 käl'dwēl; 2 cäl'dwēl, n. 1. A county in Kentucky; 338 sq. m.; county-seat, Princeton. 2. A parish in Louisiana; 557 sq. m.; parish-seat, Columbia. 3. A county in Missouri; 426 sq. m.; county-seat, Kingston. 4. A county in North Carolina; 530 sq. m.; county-seat, Lenoir. 5. A county in Texas; 530 sq. m.; county-seat, Lockhart. 6. A city in Sumner county, Kan. 7. A town, county-seat of Burleson county, Tex. 8. A village, county-seat of Noble county, O. 9. A borough in Essex county, N. J. 10. 1 käl; 2 cäl, r. [*Prov. Eng.*] 1. To throw. 2. To taper.

**cale**, n. [*North. Eng.*] A turn; as, one's *cale* to watch. *cale'an*, 1 käl'e-an; 2 cäl'e-an, n. The Persian water-pipe or narghile; hubble-bubble. *cale'ron*; *cale'le-an*; *cale'le-on*; *cale'le-ant*.

**Ca'leb**, 1 käl'ēb; 2 cäl'ēb, n. A masculine personal name. *Bib.* 1 *Chron.* II, 9.

**Ca'leph'ra-tah**, 1 -e'ra-tā; 2 -ē'ra-tā, n. *Bib.* 1 *Chron.* II, 24.

**cale-can'non**, 1 käl'kan'an; 2 cäl'cān'on, n. A stew composed principally of potatoes and greens; an Irish dish. [*COLE*; orig. of *canon* unknown.] *col-can'non*; *col-can'non*; *calcanon* night [*St. Johns, Newfoundland*].

**Cal'che'**, 1 käl'chē; 2 cäl'chē, n. [*Sp.*] A calash.

**Cal'e-do-ni-a**, 1 käl'ē-dō-ni-a; 2 cäl'ē-dō-ni-a, n. 1. Ancient and poetical name of Scotland. 2. A county in Vermont; 652 sq. m.; county-seat, St. Johnsbury. 3. A village in Livingston county, N. Y. 4. A village in Houston county, Minn.

**Cal'e-do-ni-an**, 1 käl'ē-dō-ni-an; 2 cäl'ē-dō-ni-an, a. Of or pertaining to Caledonia (northernmost Britain of Roman times) or its inhabitants, or, in modern rhetorical usage, of or pertaining to the Highlands, all Scotland, or the Scotch. —**Caledonian folding** (*Geol.*), a pre-Devonian mountain-building crumpling that affected the rocks of Northern Europe.

—**Abyssinian Calendar** begins with the 1st of Maskaram, which corresponds to about September 10; the year consists of 365 days (366 in leap-year) divided into 12 months of 30 days. Maskaram, Tekmet, Hadar, Tahsas, Taz, Kekatit, Magawit, Miziat, Genbot, Sannil, Hamle, Nashit, with 8 days, known as Pagmen or Quagim, and kept as holidays. In style this calendar is 7 years and 8 months behind the Gregorian, and Easter falls a week later. —**Calendar Amendment Act**, an English statute providing for the adoption of the Gregorian amendment of the Julian calendar, passed in 1751, and going into effect

Sept. 3, 1752, which day was by its provisions reckoned as the 14th, to cancel the 11 days' difference between the old and new styles. It further transferred the beginning of the New Year from March 25 to Jan. 1, beginning in 1753. Lord Chesterfield's Act, — c. clock, which, in addition to the ordinary time-recording functions, notes the days of the week, month, or year, the movements of the heavenly bodies, etc. — **c. month** or year, a month or year as defined in a calendar, especially the Gregorian calendar; distinguished from a lunar month; also, a period equivalent to a month, as from Jan. 15 to Feb. 15. — **cal'en-dar-stone**, n. A stone bearing carved figures formerly considered of calendar value; specifically, a circular Aztec monolith, weighing almost 50 tons, unearthed in Mexico in 1790 and moved to the Museum in Mexico City in 1895. Its carvings, formerly taken to represent the Aztec calendar, are now believed to indicate that the stone was a votive offering. — **Chinese c.**, the calendar used by the people of China, having a year composed of twelve months, each having about 29 or 30 days, an intercalary month being added every thirty years. The New Year falls between Jan. 21 and Feb. 19, or on the first moon after the sun enters Aquarius. — **Greek c.**, any one of the calendars used by the Greeks. In ancient times these varied in the different states, as to length, names, and positions in the year, of the several months; and there is much uncertainty about some of the systems followed. But the year was generally based on lunar motions, and alterations were made from time to time to adjust the lunar and solar year. The following is a list of the Attic months, with the number of days in each and approximation to the months of our present system:

The Julian calendar is the one in use in modern Greece. — **Gregorian c.**, the calendar prescribed by Pope Gregory XIII., by which the Julian calendar was modified by calling Oct. 5, 1582, Oct. 15, and continuing the count ten days in advance, and by making the terminal years of the centuries, 1700, 1800, 1900, etc., common years of 365 days, except when the year was a multiple of 400, as 1600, 2000, etc.; the calendar now in use in nearly all Christian countries except Russia and Greece. *new style*.  — **Hebrew c.** The present calendar of the Jews; derived from the Babylonians and in use substantially in its present form since the Babylonian captivity. The present names of the months are all of Babylonian origin. A few of the months have older Hebrew names, given in the Bible, but in the main the months were given simply by number. The Hebrew calendar reckons the date of creation 3,760 years and 3 months before the birth of Christ. The Hebrew month is a lunar month, but the years are corrected to solar time. Its principal periods are the *cycle*, of 19 years; the *year*, either ordinary or embolismic, containing 12 and 13 lunar months respectively, or 353-355 and 383-385 days; the *month*, of 29 or 30 days; and the *intercalary month*, occurring only in the embolismic years, and containing 30 days intercalated. Of these 30 days, 29 belong to *Ve-Adar*; and the month *Adar*, which in ordinary years has 29 days, in embolismic years has 30 days. Each cycle contains 7 embolismic years. The adjustment of the months as above indicated precludes the comparison of the Hebrew months with those of the Gregorian calendar except by approximation based on an average. The following gives the results of such an average, with the length of the respective months in days:

— **Hindu c.**, the calendar in use in India. The Vedic races from whom the Hindus sprang divided the year into six seasons, *Vasanta*, or Spring, the "flowery"; *Grishma*, the "hot"; *Varsha*, the "rainy"; *Sarada*, the "salty"; *Hemanta*, the "frosty"; and *Sisira*, the "dewy." In process of time

these seasons were subdivided in honor of the Solar and Lunar Dynasties who were believed to have held sway in India, and these lunar divisions were named after or held sacred to these legendary heroes or divinities. The months of the year, beginning with Balsakh, which corresponds to the latter part of April and the opening week of May, are Jeth, Asarh, Sravastha, Bhadra, Kuar, Kartika, Agrah, Pus, Margh, Phagun, or Phalguna, and Chaitra. The intercalary month takes the name of the month after which it is inserted. Phagun or Phalguna is a month of rejoicing, and from Phag, its eighth day, to Poonini, its last day, the festivities resemble the Saturnalia of ancient Rome. Bhadra is the month of the birth of Krishna, to whom the months of Sravastha and Kartika are sacred.—**hundred-year c.**, a form of almanac giving the calendar and predictions of the weather for a hundred years; formerly common in Germany.—**Julian c.**, the calendar prescribed by Julius Caesar, in which three years of 365 days each were always followed by one of 366 days, and the months, after some changes made by Augustus as to their number and days, had the length now adopted in Europe and America. This calendar is now 13 days behind the Gregorian calendar. **old style.**—**Mexican c.**, a pre-Columbian calendar used by the inhabitants of Mexico and Yucatan, combining an astrological and a solar calendar, the first consisting of 13 and the second of 18 periods of 20 days each, or 260 and 360 days respectively. To the latter were added 5 days, making a year of 365. Each of the 360 days was dedicated to a deity; the last 5 were not, and were consequently deemed unlucky. The days of the astrological calendar bore the names of objects.—**Mohammedan c.**, the calendar generally used in almost all Mohammedan countries, reckoning time from July 16, A. D. 622, the day following Mohammed's flight from Mekka to Medina (the Hegira). The year consists of 12 lunar months of a mean duration of 29 days, 12 hours, 44 minutes. A cycle consists of 30 years, of which 19 are ordinary years of 354 days each, and 11 are embolismic, with 355 days. The following list gives the names and durations of the months:

The New Neoplatonic Calendar, or Malesforter's Bloody Register, containing Authentic and Circumstantial Accounts of the Lives, Transactions, Exploits, Trials, Executions, Dying Speeches, Confessions, and Other Curious Particulars, relating to all the most notorious Criminals, and Violators of the Laws of their Country, who have suffered Death and other Exemplary Punishments, in England, Scotland, and Ireland, from the Commencement of the Year 1700 to the Present Time. *Newgate Calendar* title-page.—**perpetual c.**, a calendar by which may be ascertained the day of the week in any given year during a widely extended period of time.

PERPETUAL CALENDAR.

To find the day of the week for any given date:  
(1) Take the last two figures of the year, add  $\frac{1}{2}$  of them, neglecting remainder. (2) Add for the month, if for Jan. or Oct., 1; May, 2; Aug., 3; Feb., Mar., or Nov., 4; June, 5; Sept., or Dec., 6; April or July, 0; if leap-year (that is, if it be divisible by 4 without remainder) Jan., 0; Feb., 3.  
(3) Add day of month. Divide the sum of these three by 7, and remainder gives the number of the day of the week. Thus:

What day of the week was August 23, 1911?  
(1)  $11 + 2 = 13$   
(2) August = 3  
(3) Date = 28  
 $44 = 7 \times 6 + 2$  or second day of the week = Monday.

The foregoing applies only to the 20th century. For 19th century, add 2; for 21st century, add 6; 18th century, 4; but before 1752 the "old style" was used.

**Republican or Revolutionary c.** (*F. Hist.*), the calendar instituted by the French Republic, by the first French republic, and abolished Dec. 31, 1805. Its scheme divided the year into 12 months of 30 days each, with five (or six) supplementary days (Sansculottides) at the end of the last month. The months were divided into 3 decades, every tenth day being a day of rest, Sundays being ignored. Provision was made for leap-years by adding a sixth day to the supplementary days whenever necessary to make the year terminate at the equinox, which was generally every fourth year. Each four-year period was termed a *franchise*. The calendar was retrospective in action, and its first year (Year I) began Sept. 22, 1792. The months and their corresponding periods in the Gregorian calendar are as follows:  
Vendémiaire, Sept. 22 to Oct. 21. Floréal, April 20 to May 19. Brumaire, Oct. 22 to Nov. 20. Prairial, May 20 to June 18. Frimaire, Nov. 21 to Dec. 20. Messidor, June 19 to July 18. Nivose, Dec. 21 to Jan. 19. Thermidor (or Fervidor), Pluviose, Jan. 20 to Feb. 18. July 19 to Aug. 17. Ventose, Feb. 19 to Mar. 20. Fructidor, Aug. 18 to Sept. 16. Germinal, Mar. 21 to April 19. Sansculottides, Sept. 17 to Sept. 21.

—**Roman c.**, the earliest Roman calendar, attributed to Romulus, is supposed to have been based upon a year of 10 months, or 304 days, viz.:

Month.	No. of Days.	Month.	No. of Days.	Month.	No. of Days.
Mar-tius.	31	Quin-tilis.	31	No-ven-ber.	30
Apr-ilis.	30	Sep-tilis.	30	De-cem-ber.	30
Ma-ius.	31	Sep-tem-ber.	30		
Jun-ius.	30	Oc-to-ber.	31		304

Like all lunar calendars, this had to be adjusted by intercalation to correct the difference between the lunar and solar years. Numa intercalated a month called Mercedinus; this consisted of 22 or 23 days alternately, and was inserted every second year. Other changes were made by decemviral legislation. Numa also added two months—February and January—which were inserted between December and March, but in 452 B. C. the Decemvirs changed their positions, and placed these months in the order they now occupy. In 463 B. C. Julius Caesar ordained the Julian calendar, by which time was measured by most civilized nations till the accumulation of error necessitated the establishment of the Gregorian calendar.—**Russian c.**, the Julian calendar, *cal'en-deri*.—*cal'en-da-ri-al*, a. **Cal'op-sit'ti-ne**, 1 kal'op-sit'ti-ne; 2 cāl'op-sit'ti-ne, n. pl. Ornith. A subfamily of *Ornithidae* with narrow and pointed tail-feathers, including the cockatoos. [*Cal'op-sit'ti-ne*, n. (t. g.) [*Gr. kalos*, beautiful, + *psittacus*, parrot.] — **cal'op-sit'ti-ne**, a.  
**cal'o-res'cence**, 1 kal'o-res'ens; 2 cāl'o-rēs'ēns, n. The generation of luminous heat-rays from obscure heat-rays by their passage through or reflection by a partially transparent body.  
**cal-or'i-a**, 1 ka-lō'ri-a; 2 ca-lō'ri-a. Derived from Latin *calor*, heat; (see *CALORIC*) a combining form.  
Words beginning with this prefix will be found in alphabetical place, either singly or in groups.  
**cal-or'ic**, 1 ka-lō'rik; 2 ca-lō'rik, a. Of or pertaining to heat. — **caloric paradox**, see *SPHEROIDAL STATE*.  
**cal-or'ic**, n. 1. A hypothetical elastic imponderable fluid formerly supposed to produce the phenomena of heat. 2. Heat.  
This word [*caloric*] is still used loosely as a synonym for heat. . . . To me it has been new to find that this so familiar word *caloric* . . . was apparently coined only toward the last quarter of the last century. S. P. LANGLEY in *Proc. A. A. S.* vol. xxxvii, p. 7. [pub. by sec.]  
[< *L. calor*, heat, < *calere*, be hot.] — **cal-or'i-cal-ly**, adv.  
**cal'o-rim'e-ty**, n. The power possessed by animals of developing heat and maintaining a nearly constant internal temperature. — **cal'o-rim'e-duct**, n. A caloduct.  
**cal'o-rie**, 1 ka-lō'ri; 2 cāl'o-re, n. — **FI** Same as *CALORY*.  
**cal-or'i-fa'cient**, 1 ka-lō'ri-fē'shent; 2 ca-lō'ri-fā'shent, a. Heat-producing. — **cal-or'i-fa'nt**, n. — **cal-or'i-fa'nt**, n. A French heating apparatus employing hot water.  
**cal'o-rif'ic**, a. Able to produce heat; heating; carrying heat; thermal. **cal'o-rif'ic-cal**, a.  
It is the caloric waves emitted by the sun which heat our air, produce our winds, and hence agitate our ocean.  
TYNDALL *Fragments of Science* lect. viii, p. 208. [A. 1871.]  
— **calorific intensity**, the degree of temperature obtained by the complete combustion of a fuel; pyrometric effect.  
— **c.** power, the number of gram-calories resulting from complete combustion of a gram of fuel. — **c. value**, the number of calories present in a unit of fuel. — **cal'o-rif'ic-ally**, adv. — **cal-or'i-fa'ction**, n. The production of heat, especially of animal heat. — **cal'o-rif'ic**, n. 1. The science of heating. 2. The branch of physics that treats of heat, especially of the discarded caloric theory. — **cal-or'i-fier**, n. A heating-apparatus. — **cal-or'i-fy**, n. To make hot; heat.  
**cal'o-rim'e-ter**, 1 kal'o-rim'e-ter; 2 cāl'o-rim'e-ter, n. 1. Any apparatus for measuring the quantity of heat generated in a body or emitted by it, as by observing the quantity of a solid liquefied or a liquid vaporized under given conditions, used in determining specific heat, latent heat, the heat of chemical combination, etc.  
The amount of heat developed by chemical action is of great practical importance. . . . The first experiments upon this subject were made in 1780, by Lavoisier and Laplace, by means of their ice calorimeter. B. SILLIMAN, which chopped ice is melted; o. 2. The combined area of cross-section of outer ice-chamber-smoke-flues or passages, as in a loco-bore to counter-motive-boiler. [*CALORI* + *METER*.] — **act outside heat**, **res'pl-ra-tion**, **cal'o-rim'e-ter**, n. An instrument for measuring the amount of heat exhaled by respiration, — **throttling c.**, a mechanism for determining the moisture

in steam.—calor-i-met'ric, *a.* Relating to or serving for calorimetry; as, a *calorimetric* unit. *calor-i-met'ric*—calorimetric bomb, an instrument for measuring the heat generated by combustion.—calor-i-met'ric-cal-y, *adv.* *calor-i-met'ric-ly*, *n.* The art or process of measuring heat, especially the quantity of heat emitted or absorbed by a body.

calor-i-mo'tor, 1 ka-lor'i-mō'tor or -tor, 2 ca-lōr'i-mō'tor *n.* *Elec.* A voltaic battery with two very large plates and great heat-producing power. [*< CALORI- + MOTOR.*]

cal'o-ris't, 1 ka'l'o-ris't; 2 ca'l'o-ris't, *n.* A believer of the caloric hypothesis. [*< L. calor, heat, < caleo, be hot. i—cal'o-ris'tic, a.*]

cal-or'i-trop'ic, 1 ka-lor'i-trop'ic; 2 ca-lōr'i-trop'ic, *a.* *Biol.* Of or pertaining to the growth or deflection of certain organisms under the effect of heat. [*< CALORI- + TROPIC*]

cal-or'i-tropism, *n.*

cal-or'i-za'tor, 1 ka-lor'i-zā'tor; 2 ca-lōr'i-zā'tor, *n.* A cylindrical apparatus used in extracting beet-sugar to heat the juice and so promote diffusion. *cal'o-riz'eri*.

cal'o-ry, 1 ka'l'o-ry; 2 ca'l'o-ry, *n.* [*-ries, 1-niz; 2-ry, pl.*]

1. One of two recognized units of heat, of which the greater calory or kilogram *c.* is the amount of heat necessary to raise 1 kilogram of water 1° C.; the lesser *c.* or small *c.* being the amount of heat necessary to raise 1 gram of water 1° C.

The values of the equivalent in terms of the units most commonly employed at the present time are as follows:

777 foot-pounds (Lat. 45°) are equivalent to 1 B. Th. U. (lb. deg. Fahr.)

1399 foot-pounds (Lat. 45°) are equivalent to 1 lb. deg. C.

426.3 kilogrammetres are equivalent to 1 kilogram-deg. C. or kilocalorie.

426.3 grammetres are equivalent to 1 gram-deg. C. or calorie.

4180 joules are equivalent to 1 gram-deg. C. or calorie.

The water for the heat units is supposed to be taken at 20° C. or 68° F., and the degree of temperature is supposed to be measured by the hydrogen thermometer.

*Encyc. Brit.* 11th ed., vol. xiii, p. 145.

2. *Dietetics.* A unit to indicate heat or energy-producing value of food; also, the amount of food required to produce them. [*< F. calorie, < L. calor, see CALORI.*]

cal'o-ri-er, *n.* The quantity of heat necessary to bring a gram of water from 0° C. to 100° C.—15° water *c.*, a calory determined by using the thermometric scale of hydrogen and taking water at 15° C as the standard of heat capacity.

cal'o-so'ma, 1 ka'l'o-sō'ma; 2 ca'l'o-sō'ma, *n.* A carabid beetle (genus *Calosoma*), as *C. scrutator*, which preys upon canker-worms. [*< Gr. kalos, beautiful, + soma, body.*]

cal'o-sphie'ri-a, 1 ka'l'o-sf'i-ri-a; 2 ca'l'o-sf'i-ri-a, *n.* *Bot.* A genus of fungi belonging to the class *Ascomycetes*, having one-celled transparent spores, and in which the perithecia occur grouped beneath the outer coat of the host. [*< Gr. kalos, beautiful, + sphaira, sphere.*]

cal'o-sio'ma, 1 ka'l'o-siō'ma; 2 ca'l'o-siō'ma, *n.* *Bot.* A genus of parasitic fungus, the puffballs—of the order *Lycoperdites*, with the peridium situated at the head of a stalk which consists of gelatinous intertwined filaments. [*< Gr. kalos, beautiful, + soma, mouth.*]

cal'tro-ro-plis, 1 ka-lōt-ro-plis; 2 ca-lōt-ro-plis, *n.* *Bot.* A small genus of tropical shrubs or small trees of the milkweed family. *C. gigantea* of the East Indies furnishes a strong fiber and a medicinal bark. [*< Gr. kalos, beautiful, + tropis, keel, < trepo, turn.*]

cal-lotte', 1 ka-lōt'; 2 ca-lōt', *n.* [*F.*] 1. A skull-cap worn by the Roman Catholic clergy. 2. The close-fitting crown of anything worn on the head; as, the calotte of a helmet. 3. *Zool.* A cap-like part: (1) A patch of color covering a bird's crown. (2) The point of attachment of diatomid parasites. (3) The aboral polar disk in an embryonic polyzoon. 4. (1) A dome, cap-shaped ceiling of a room, or the like. (2) A cover or metal cap, as for a spire. 5. [*Eng.*] The coil of a serpent at its tail. [*Cal-lotte'* *cal-lotte'*—to assume the calotte, to enter the priesthood.]

cal'o-type, 1 ka'l'o-taip; 2 ca'l'o-typ, *n.* 1. A photograph made by the process invented in 1841 by Fox Talbot, now superseded. The image was received directly upon paper sensitized by silver iodide and a solution of silver nitrate in gallic acid, then developed by the two last-named agents and fixed by sodium hyposulfite. 2. The process of making such pictures. [*< Gr. kalos, beautiful, + typos, type, < cal'o-type, et.*]

cal'o-tye, 1 ka'l'o-tye or ka-lō-tye; 2 ca'l'o-tye or ca-lō-tye, *n.* *Gr. Ch.* A monk, especially one of the order of St. Basil. [*F.* *< Gr. kalos, beautiful, + typos, old age.*]

calp, 1 kalp; 2 cāp, *n.* [*Ir.*] A bluish-black to grayish-blue limestone found in Ireland.

cal'pac, 1 kal'pak; 2 cā'pāc, *n.* [*Turk.*] A black sheepskin or felt cap worn by Armenians and other Orientals. *cal'packed, a.* Wearing a calpac.

cal'pet, 1 kalp; 2 cāp, *n.* [*Scot.*] A Highlander's tribute, usually a cow or horse, paid to his chief for protection.

cal'pē, 1 kal'pē; 2 cā'pē, *n.* The ancient name of Gibraltar. *Cal'pē, 1 kal'pē; 2 cā'pē, n.* *Bib.* (Apocrypha). *1 Mac.* xl, 70.

cal'pils, *n.* Same as *KALPIS*.

cal-pul'it, 1 kal-pul'it; 2 cā-pul'it, *n.* [*Mex.*] A section of a city; also, the inhabitants of such a section.

Cal-pur'ni-a, 1 kal-pūr'ni-a; 2 cā-pūr'ni-a, *n.* Julius Caesar's fourth wife. [*process of calking.*]

cal-put'tee, 1 kal-put'tee; 2 cā-put'tee, *n.* [*Anglo-Ind.*] 1. The calque. 1 kalp; 2 cāp, *n.* [*Scot.*] Same as *CALK*.

cal'so-mine, *et.* Same as *CALUMINE*.

Cal'ta-bel-ō-tā, 1 kal'tā-bēl-ō-tā; 2 cā'tā-bēl-ō-tā, *n.* A town in Girgenti province, Sicily.

Cal'ta-gi-ro-nē, 1 kal'tā-gi-rō-nē; 2 cā'tā-gi-rō-nē, *n.* A manufacturing town in Catania province, Sicily.

Cal'ta-ni-set'ta, 1 kal'tā-ni-sē'tā; 2 cā'tā-ni-sē'tā, *n.* 1. A province in Sicily; 1,263 sq. m. 2. Its capital. *Cal'ta-ni-sē'tā, n.*

cal'te-pōn, 1 kal'tē-pōn; 2 cā'tē-pōn, *n.* [*Mex.*] A lizard (*Holacercus horridum*).

Cal'tha, 1 kal'tha; 2 cā'tha, *n.* [*L.*] *Bot.* 1. A small genus of chlorous perianth marsh-herbs of the crowfoot family, having large heart-shaped or kidney-shaped entire leaves, and one or several yellow or white flowers. *C. palustris* is the marsh-marigold of Europe and North America. 2. [*le*] Any plant of the genus *Caltha*.

cal'throps, 1 kal'throps; 2 cā'throps, *n.* [*Scot.*] A quadrilateral spicule. [*< CALTHROPS*]

cal'trop, 1 kal'trop; 2 cā'trop, *n.* [*Scot.*] 1. A small four-pronged iron instrument, formerly a ball with four spikes, of which one is always upright. 2. A caltrop.

cal'trop, 1 kal'trop; 2 cā'trop, *n.* [*Scot.*] 1. A small four-pronged iron instrument, formerly a ball with four spikes, of which one is always upright. 2. A caltrop.

cal'trop, 1 kal'trop; 2 cā'trop, *n.* [*Scot.*] 1. A small four-pronged iron instrument, formerly a ball with four spikes, of which one is always upright. 2. A caltrop.

cal'trop, 1 kal'trop; 2 cā'trop, *n.* [*Scot.*] 1. A small four-pronged iron instrument, formerly a ball with four spikes, of which one is always upright. 2. A caltrop.

cal'trop, 1 kal'trop; 2 cā'trop, *n.* [*Scot.*] 1. A small four-pronged iron instrument, formerly a ball with four spikes, of which one is always upright. 2. A caltrop.

cal'trop, 1 kal'trop; 2 cā'trop, *n.* [*Scot.*] 1. A small four-pronged iron instrument, formerly a ball with four spikes, of which one is always upright. 2. A caltrop.

stands erect; also, in the plural, broken pottery or other material used in the place of such irons.

It was found necessary to erect a stockade about the town-hall and to plant caltrops and other obstructions in the squares and streets.

Motley *John of Barnefeld* vol. ii, p. 135. [*l.*]

2. One of various plants with spiny heads or fruit that entangle the feet, as the star-thistle (*Centaurea calcitrapa*), the land-caltrop (*Tribulus terrestris*), and the water-caltrop (*Trapa natans*). 3. One of the sharp, curved, loose spicules in the skin of the stinging caterpillars of butterflies of the family *Limacodidae*, to which urtication is due. 4. A trap or snare for the feet. [*< AS. calcitrapa, < LL. calcitrapa, < L. calx (calc-), heel, + LL. trappa, < OHG. trapo, trap.*]

cal'throp; 1 kal'throp; 2 cā'throp, *n.* [*Scot.*]

Cal'tu'le, 1 ka-lū'tu; 2 ca-lū'tu, *n.* *Bib.* (Douai).

Cal'tu'le-et-Cul're, 1 ka'lū'tw-ē't-cul'r; 2 cā'lū'tw-ē't-cul'r, *n.* A town, suburb of Lyons, in Rhone department, France.

cal-um'ba, 1 ka-lū'm'bā; 2 ca-lū'm'bā, *n.* *Bot.* An evergreen menispermaceous climbing plant (*Coccoloba fenestrata*) native in southern India. In medicine the dried root is sometimes substituted for the more valuable root of *Calumba radix*, an East-African twiner. See *CALUMBA*.

cal-um'ba; 1 ka-lū'm'bā; 2 ca-lū'm'bā; 3 co-lū'm'bā; 4 co-lū'm'bā; 5 co-lū'm'bā; 6 co-lū'm'bā; 7 co-lū'm'bā; 8 co-lū'm'bā; 9 co-lū'm'bā; 10 co-lū'm'bā; 11 co-lū'm'bā; 12 co-lū'm'bā; 13 co-lū'm'bā; 14 co-lū'm'bā; 15 co-lū'm'bā; 16 co-lū'm'bā; 17 co-lū'm'bā; 18 co-lū'm'bā; 19 co-lū'm'bā; 20 co-lū'm'bā; 21 co-lū'm'bā; 22 co-lū'm'bā; 23 co-lū'm'bā; 24 co-lū'm'bā; 25 co-lū'm'bā; 26 co-lū'm'bā; 27 co-lū'm'bā; 28 co-lū'm'bā; 29 co-lū'm'bā; 30 co-lū'm'bā; 31 co-lū'm'bā; 32 co-lū'm'bā; 33 co-lū'm'bā; 34 co-lū'm'bā; 35 co-lū'm'bā; 36 co-lū'm'bā; 37 co-lū'm'bā; 38 co-lū'm'bā; 39 co-lū'm'bā; 40 co-lū'm'bā; 41 co-lū'm'bā; 42 co-lū'm'bā; 43 co-lū'm'bā; 44 co-lū'm'bā; 45 co-lū'm'bā; 46 co-lū'm'bā; 47 co-lū'm'bā; 48 co-lū'm'bā; 49 co-lū'm'bā; 50 co-lū'm'bā; 51 co-lū'm'bā; 52 co-lū'm'bā; 53 co-lū'm'bā; 54 co-lū'm'bā; 55 co-lū'm'bā; 56 co-lū'm'bā; 57 co-lū'm'bā; 58 co-lū'm'bā; 59 co-lū'm'bā; 60 co-lū'm'bā; 61 co-lū'm'bā; 62 co-lū'm'bā; 63 co-lū'm'bā; 64 co-lū'm'bā; 65 co-lū'm'bā; 66 co-lū'm'bā; 67 co-lū'm'bā; 68 co-lū'm'bā; 69 co-lū'm'bā; 70 co-lū'm'bā; 71 co-lū'm'bā; 72 co-lū'm'bā; 73 co-lū'm'bā; 74 co-lū'm'bā; 75 co-lū'm'bā; 76 co-lū'm'bā; 77 co-lū'm'bā; 78 co-lū'm'bā; 79 co-lū'm'bā; 80 co-lū'm'bā; 81 co-lū'm'bā; 82 co-lū'm'bā; 83 co-lū'm'bā; 84 co-lū'm'bā; 85 co-lū'm'bā; 86 co-lū'm'bā; 87 co-lū'm'bā; 88 co-lū'm'bā; 89 co-lū'm'bā; 90 co-lū'm'bā; 91 co-lū'm'bā; 92 co-lū'm'bā; 93 co-lū'm'bā; 94 co-lū'm'bā; 95 co-lū'm'bā; 96 co-lū'm'bā; 97 co-lū'm'bā; 98 co-lū'm'bā; 99 co-lū'm'bā; 100 co-lū'm'bā; 101 co-lū'm'bā; 102 co-lū'm'bā; 103 co-lū'm'bā; 104 co-lū'm'bā; 105 co-lū'm'bā; 106 co-lū'm'bā; 107 co-lū'm'bā; 108 co-lū'm'bā; 109 co-lū'm'bā; 110 co-lū'm'bā; 111 co-lū'm'bā; 112 co-lū'm'bā; 113 co-lū'm'bā; 114 co-lū'm'bā; 115 co-lū'm'bā; 116 co-lū'm'bā; 117 co-lū'm'bā; 118 co-lū'm'bā; 119 co-lū'm'bā; 120 co-lū'm'bā; 121 co-lū'm'bā; 122 co-lū'm'bā; 123 co-lū'm'bā; 124 co-lū'm'bā; **can**, 1 kan; 2 cān, tr. [COULP.] [A defective auxiliary now having no infinitive and used only in the present and imperfect indicative and in forming the subjunctive. Compare **may** and **will**.] 1. To have physical, moral, or intellectual ability to; as, he can outdo every competitor. 2. To have the skill or knowledge to; as, can you tell me?

Can is a variety of ken, 'to know,' and means etymologically 'to know how.'

Whitney *Lang*, and *Study of Lang*, p. 111. [s. 1874.]

3. To be able under existing circumstances to; as, I could bear to see it. 4. To have capacity to; as, my cup can hold more. 5. To have the means to; as, when men can sail through the air. 6. To be competent or permitted to; as, you can come and go as you please. 7. To be possible to; as, could this but last forever. 8f. To understand; be able to do; know; as, I can no Latin. [*AS. can*, 1st and 3d per. sing. of *cunnan*, know.] Can is constantly misused for may. Can always refers to some form of possibility. An armed guard may say "You can not pass," since he has physical power to prevent; hence the question "Can I pass the guard?" is perfectly natural. But where simple permission is referred to, may should be used. "May I (not can I) use your ruler?"

Sometimes the terms "can" and "can not but" are misused. They should be carefully distinguished. "I can but conclude" means that to the speaker no other conclusion is possible: "I can not but conclude" signifies that the speaker can not help drawing the conclusion.

A cantering rhythm, rhythm with the two regular heart-sounds broken by the introduction of a third sound, due to reduplication of the second sound. **can-ter**, *n.* 1. A system of quadrupedal locomotion in which the feet are landed on the ground in the same consecutive order as in the walk, but at shorter or quicker comparative intervals of time. See WALK. Assuming that in the canter the notation is begun after a propulsion through the air with a final thrust by the left fore foot, the landing will take place on the right hind foot, followed in order by the right fore, the left hind, and the left fore, from which a succeeding thrust of the ground will be effected. The consecutive supporting feet are: (1) the right hind foot; (2) the right hind and right fore feet; (3) both hind and the right fore feet; (4) the left hind and right fore feet; (5) the left hind and both fore feet; (6) the left hind and left fore feet; (7) the left fore foot alone, from which the animal leaves the ground. See MOVEMENT, *n.* The canter is usually regarded as a slow gallop, probably from the facility with which a change from one gait to the other can be effected; an important difference will, however, be observed. EDWARD MUYBRIDGE *On the Science of Animal Locomotion* p. 10. [n. i. or. Brit.] 2. A moderate, easy gallop; a hand-gallop.—**to win in a canter**, in horse-racing, to outstrip all competitors so far as to come leisurely to the winning-post; hence, to vanquish opponents with ease. **can-ter**, *n.* One who or that which tilts. Car'te'sian-ism, 1 kar-tē'shān-izm; 2 cār-tē'shān-izm, n. The philosophy of Descartes, sometimes called the "father of modern philosophy." The special characteristics of Cartesianism are involved in its method, which aimed to start from the postulate that the being of the Self is intuitively known in every act of self-consciousness (cogito; ergo sum), and then proceed by demonstrative arguments, after the analogy of mathematics, to indisputable propositions with regard to the Being of God and of an external world. Inasmuch, however, as the conception of God was made a matter of irresistible and clear perception, and the existence of an external world only an inference from the divine veracity, and because the distinction between thought and extension was so emphasized, the system resulted in an extreme form of dualism. See DESCARTES.

6. *Gram.* The relation of a noun, pronoun, or, in inflected languages, an adjective to other words in the sentence, or its form indicating the relation.

In English case has for the most part come to signify a relation, the inflection or case-endings being confined to the possessive ('s) of the noun, and to the pronouns; as, nominative case, thou; possessive, thine; objective, thee. The French has no case-ending save for pronouns, Latin has six, German has four, Greek has five (including the vocative), Sanskrit has eight (nominative, accusative, instrumental, dative, ablative, genitive, locative, and vocative); some Semitic and other languages have an elaborate case system, but the general tendency is to repress inflections by prepositions.

A case, in the declension of a noun, means a falling away, or a deflection from the upright nominative.

DE QUINCEY *Literary Reminiscences* vol. ii, p. 300. [*r. & r.* 1854.]
